

## BSAU APPLE iOS APPLICATION DEVELOPMENT CENTRE

05.03.2020

### REPORT OF VALUE ADDED COURSE

BSAU Apple iOS Application Development Centre has offered the value added course, **Certificate course in Android Application Development** during Oct-Dec 2019. This course was designed in such a way that to give real time exposure in mobile app development to our students. Duration of the course was 48 hours.

The main objective of the course is to provide comprehensive training in Android application development in the Java language. Students can have good exposure on application design, tools and techniques. The highlight of this certificate course is to provide good hands on experience to students on developmental tools so that the students will be able to develop applications that run on Android OS platform.

Students from various branches of the Institution has participated and successfully completed the course. The topics covered in the course includes Java basics for Android, Android fundamentals and advanced concepts in Android. The tool used for the App Development is Android IDE. The course was a mixture of both theory and practical sessions.

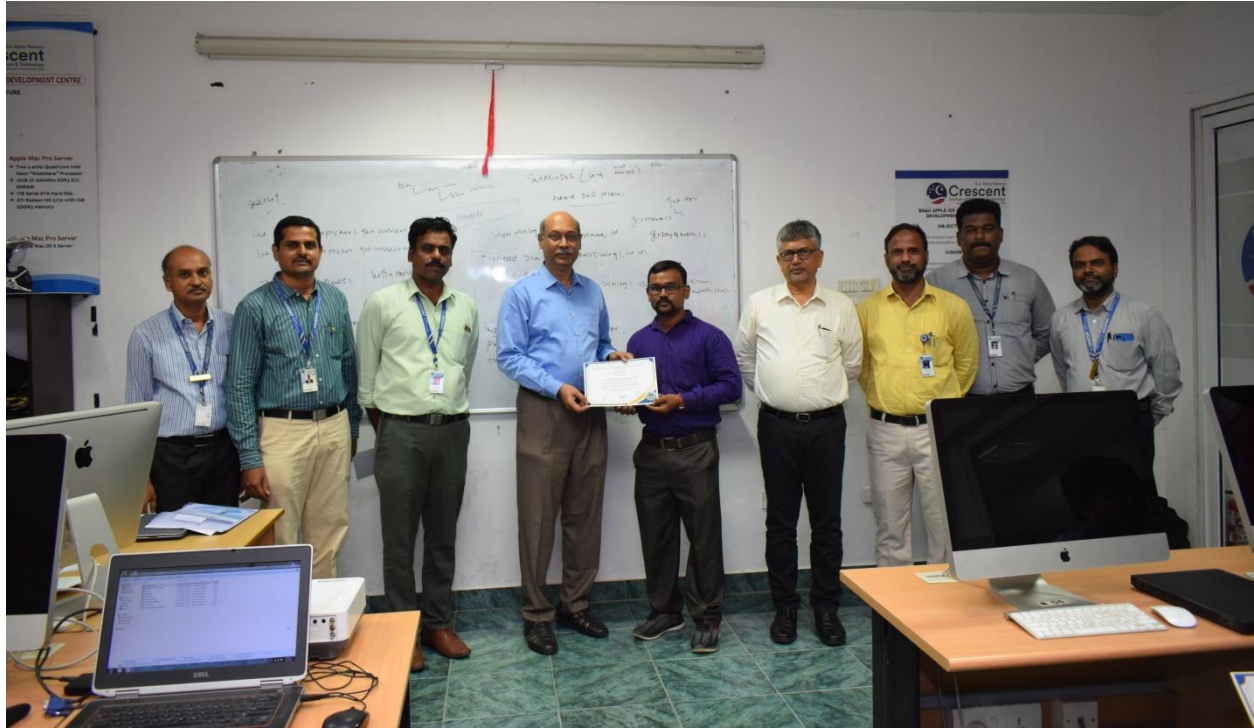

The course completion certificates were distributed to the participants by our Pro Vice Chancellor Dr. A. Peer Mohamed and our Registrar Dr. A. Azad on 04.03.2020 in BSAU Apple iOS Application Development Centre.

Dr. VenkatesanSelvam, Dean, School of Computer, Information and Mathematical Sciences, has given the welcome address and briefed about the course in the event. Pro Vice Chancellor and Registrar have conveyed their wishes to all the participants of the value added course and insisted to continue the learning to excel in their career.

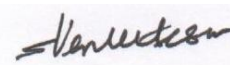

Dr. GufranAhamed Ansari, Professor & Head, Department of Computer Applications, Mr. N. Rajendran, AP (Sr.Gr.) / IT & Coordinator of BSAU Apple iOS Application Development Centre, Dr. P. Gnanasekaran, AP /IT, Mr. A. Salman Ayaz, AP / CA and Mr. V.M. NiazAhamed, AP / CA were also present in the certificate distribution event.

The resource person for this course was Mr. F.M. Mohammed Farooq Abdulla, Development Engineer, Sirpi Software Pvt Ltd., Chennai (incubated in CIIC), who has shared his real time app development experience during the course. He is our Crescent Alumni (B.E. CSE in 2004-08 and M.Tech IT in 2010-12) who has voluntarily expressed his willingness to share his experience through this course to our young students.

The outcome of the course is that the students are able to develop applications that run on the Android OS platform and acquire the advanced development skills needed to release their own high-quality App to the Google Play Store.

The course was coordinated by Mr. N. Rajendran, Assistant Professor (Sr.Gr.) / IT and Coordinator of BSAU Apple iOS Application Development Centre. Mr. R. Sathish Kumar, System Analyst has provided the technical support throughout the course.
