BE A PART OF:
GO GREEN & SAVE GREEN
One Tree All it takes

Bamboo takes in more carbon dioxide, CO₂ and produces more oxygen O₂ than our average hardwood tree. This could provide a valuable partner for fighting the climate change. Bamboo provides us with a sustainable resource from which to produce wood for construction and product purposes. Bamboo is a plant that actually helps to prevent soil erosion.

As part of Go Green & Save Green, BSA Crescent Institute of Science and Technology and NSS Units jointly organize a Mega Bamboo Tree Plantation Drive (Total 2000 sapling) to plant at least one sapling by each student in different corners of our campus. In this regard, I request to all the Deans and Head of the Departments to send 50 students (which includes Girls, Boys and one faculty member) for planting a sapling in the respected dates allotted for them.

The students who are assigned to plant a sapling are requested to assemble in front of the first year canteen at 9.15 am.
