

Crescent Cybertronics Security Club (CCSC)

Five Days Bootcamp on Cybersecurity

From 21st October, 2024 to 25th October, 2024

Topics Covered in this Bootcamp:

- **Day 1:** Web Application Pentesting
- **Day 2:** Digital Forensics
- **Day 3:** Red Team Engagement
- **Day 4:** SIEM Simplified and understanding Splunk's role in Cyber Security
- **Day 5:** OSINT and Phishing

Eligibility Criteria for E-Certificates:

- Attend at least 4 out of the 5 bootcamp sessions.
- Achieve at least 75% in the final quiz.

Total Number of Registered Students: 132

DAY – 1: WEB APPLICATION PENTESTING DEEP- DIVE

DATE: 21ST OCTOBER , 2024 (MONDAY)

TIME: 7.00 PM(IST)

VENUE: GOOGLE MEET

1.1 About the Session:

On 21st October, 2024, the first day of the Web Application Penetration Testing session was conducted. This immersive session focused on building foundational skills in web application security, exploring common vulnerabilities, and equipping participants with hands-on experience in the initial stages of web application penetration testing. This session provided an insightful look into the techniques and strategies used to identify, assess, and mitigate vulnerabilities in web applications. Web application penetration testing has become a critical activity in the proactive defense against cybersecurity threats, ensuring that applications remain robust and secure.

1.2 Speaker of the event:

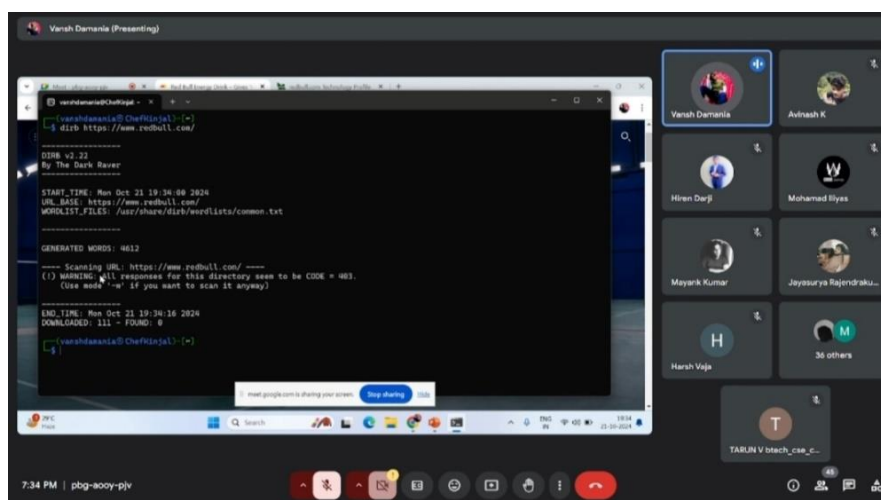

Mr. Vansh Damania, an experienced Security Analyst from Jwero.ai, conducted an in-depth presentation on web application penetration testing.

1.3 Event Promotion:

The Event Brochure was circulated to all the students of B.S Abdur Rahman Crescent Institute of Science and Technology through WhatsApp and through Instagram and LinkedIn to other university students. The link for registration of the event was circulated along with the Brochure.

WHAT IS WEB APPLICATION PENTESTING ?

- Web application penetration testing (pentesting) is a security assessment that simulates cyber attacks to identify vulnerabilities in a web application
- The goal of web app pentesting is to increase the application's resilience to cyber attacks and secure it against data exposure and unauthorized access

1.5 Feedbacks:

- Learned well from this session
- It was very helpful and we got awareness on things and threats we never knew existed
- around us
- It was very educational and wonderful. I would love to attend more events like these
- Useful and informative
- Great learning experience

DAY – 2: DIGITAL FORENSICS 101

DATE: 22nd OCTOBER 2024(TUESDAY)

TIME: 7:00 PM(IST)

LOCATION: GOOGLE MEET

2.1 About the Event:

Digital Forensics 101 is an introductory session focused on the essential practices and tools involved in digital forensic investigation. This area of cybersecurity deals with identifying, collecting, analyzing, and preserving digital evidence to investigate cyber incidents and criminal activities in the digital. Day 2 provided the foundational knowledge, enabling participants to appreciate the significance of digital forensics in investigating and securing against cyber threats.

2.2 Speaker of the Event:

On the second day of the Cyber Crime Awareness series, the session titled Digital Forensics 101 was conducted by Mr. Jeyachandran Kothandaraman, a renowned Cybersecurity Tutor and Expert in the field.

Summaries of interviews.

Alison (President):

- I don't know what Jean is talking about.
- I never asked Jean for the spreadsheet.
- I never received the spreadsheet by email.

Jean (CFO):

- Alison asked me to prepare the spreadsheet as part of new funding round.
- Alison asked me to send the spreadsheet to her by email.
- That's all I know.

Participants: Jeyachandran Kothan..., Jothi Priya, Crescent Cybertronic..., 24F2001106 TOM JOE..., Avinash K, Mohammed Ascem, Syed Mohamed, 31 others, TARUN V btach_cse_c_...

7:52 PM | nwm-nhjq-rmp

2.5 Feedbacks:

- I appreciate the hard work taken by the committee members to execute this event it was
- really helpful looking forward for more knowledgeable events
- It was actually quite interesting to see different ways cyber security and cyber attacks can
- be viewed
- It was very interactive and engaging, and I learned new things. Thank you for raising
- awareness.
- A very nice program looking forward for another one informative like this
- It was a great session

DAY – 3: RED TEAM OPERATIONS

DATE: 23rd OCTOBER , 2024 (WEDNESDAY)

TIME: 7.00 PM(IST)

VENUE: GOOGLE MEET

3.1 About the event:

Day Three of the Web Application Security Workshop was dedicated to Red Team Operations, an advanced component of cybersecurity that focuses on emulating real-world threats to assess an organization's resilience. This session provided participants with an introduction to red team objectives, methodologies, and core techniques, equipping them with practical skills in simulating complex attack scenarios. Unlike traditional penetration testing, which often has defined scopes and time constraints, red team operations aim to mimic the tactics and techniques of advanced persistent threats (APTs) to evaluate how effectively an organization can detect and respond to these threats. From this session, Participants were able to understand offensive security tactics and their application in strengthening organizational defenses.

3.2 Speaker of the Event:

This session was led by Mr. Jaswanth R, a Security Analyst with extensive experience in Red Team Operations.

3.3 Event Promotion:

The Event Brochure was circulated to all the students of B.S Abdur Rahman Crescent Institute of Science and Technology through WhatsApp and through Instagram and LinkedIn to other university students. The link for registration of the event was circulated along with the Brochure.

3.4 Feedbacks:

- I have learned about red teaming Thanks for this session to all
- I like today session. It is awesome.
- Was informative
- Was Able to acquire some knowledge about red teaming which sounded interesting

DAY – 4: SIEM SIMPLIFIED AND UNDERSTANDING

SPLUNK'S ROLE IN CYBERSECURITY

DATE: 24th OCTOBER , 2024 (THURSDAY)

TIME: 7.00 PM(IST)

VENUE: GOOGLE MEET

4.1 About the Event:

SIEM Simplified and Understanding Splunk's Role in Cybersecurity is an informative session aimed at demystifying Security Information and Event Management (SIEM) and showcasing how Splunk enhances cybersecurity practices. Splunk helps organizations streamline their security processes and improve response times. In essence, the session provides participants with a clear understanding of SIEM fundamentals and how Splunk serves as a critical tool in enhancing cybersecurity operations and threat management.

4.2 Speaker of the Event:

The event featured Mr. Vignesh S, a Junior Analyst at Positka, who shared his expertise on Security Information and Event Management (SIEM) and its vital role in modern cybersecurity strategies.

- Linux
- Mac OS
- Windows

Participants: Vignesh S, SRIVIDYA A 2022-2026, Mohammed Aseem, Avinash K, meeran, Kavin Cj, MAHIMA A 2022-2026, 14 others, TARUN V btech_cse_...

8:19 PM | nve-cxbb-azk

The screenshot shows a Zoom meeting interface. The main window displays a presentation slide titled "SIEM" (Security Information and Event Management). The slide illustrates how various security components feed data into a central SIEM system. These components include Routers, Switches, Firewalls, Intrusion Detection and Other Security Products, and Applications, Antivirus, and Antimalware, etc. Dashed lines connect each of these components to a central SIEM icon at the bottom. The Zoom interface also shows a grid of participants on the right, including Vignesh S, Mohamed Ilyas, Mohammed Aseem, Avinash K, meeran, Kavin CJ, Jayanthi Krishna, and 11 others. The bottom of the screen shows the Zoom control bar with a timestamp of 8:13 PM and the ID nve-cxbb-azk.

4.5: Feedbacks:

- Introduction and real time explained of splunk is awesome.
- Such a Wonderful session, I ppt is awesome short and sweet Explanation and i have learn many things form the session Thank you for Wonderful session for Free of Cost
- I have learned about SIEM, I have intrested in SIEM thanks for giving this opportunity
- Very Excellent session today... Thank you
- I like today session.

DAY – 5: OSINT AND PHISHING

DATE: 25th OCTOBER, 2024 (FRIDAY)

TIME: 7.00 PM(IST)

VENUE: GOOGLE MEET

5.1 About the Event:

Open Source Intelligence (OSINT) refers to the process of gathering information from publicly available sources to produce actionable insights. This data, often openly accessible on the internet, includes information from social media, websites, government publications, and other public domains. is a type of cyberattack in which attackers impersonate legitimate entities to deceive individuals into sharing sensitive information, such as login credentials or financial data. Often conducted via emails, text messages, or phone calls, phishing attacks rely on social engineering techniques to manipulate people into taking risky actions. The session commenced with Mr. Koushik Ram introducing OSINT, a process of collecting data from publicly available sources to gain insights in various targets Mr. Rohit Kumar addressed the topic of phishing. He outlined different types of phishing attacks, such as spear phishing and whaling, and emphasized the psychological manipulation tactics often used in these attacks.

5.2 Speaker of the Event:

Esteemed speakers, Mr. Koushik Ram, an intern at Azefox Pvt. Ltd., and Mr. Rohit Kumar, an intern at Logitech, delivered engaging presentations that emphasized the latest techniques, tools, and preventive strategies in these critical areas of cybersecurity.

OSINT - Open Source Intelligence

- Open-Source Intelligence (OSINT) refers to the practice of collecting information from publicly available sources to use in an intelligence context. These sources can include anything from online databases, social media, websites, forums, and more.
- Applications: OSINT is used in various fields, including cybersecurity (to gather information on potential threats), law enforcement (to track criminal activity), corporate intelligence (to gather market or competitor information), and even in journalism.
