One-Day Hands-On Workshop: Mastering Molecular Biology Techniques

 **SEPTEMBER 10, 2024**

About the Workshop

The workshop will provide hands-on training in essential molecular biology techniques, including Plasmid DNA isolation and Purification, gene amplification by PCR, Agarose Gel Electrophoresis, Rapid Gel Elution, and SDS PAGE separation of proteins. Participants will gain practical experience and deepen their understanding of these important molecular methods used in genomic research, molecular biology and biotechnology applications.

REGISTRATION AND FEES
