10th ALL-INDIA ENGINEERING COLLEGES SURVEY 2022

he Chronicle's Survey is designed in a way such that it analyses relevant data to come up with reliable and engineering aspirant friendly ranking. Incorporation of insightful content in the form of editorials authored by the top faculty and management alongside the survey also adds further value to our survey issue. In the recent times, businesses have become more global and high on technology; the need to play on an international level and have a global footprint has become more and more important. Considering the pandemic, the change and evolution in all aspects of technology and its education is inevitable and is already taking place at a global level. This will expectedly lead to elimination of some jobs and creation of new roles demanding modified skill sets calling for constant need of being updated.

Companies are on a constant lookout for competent individuals who can address these areas effectively. Engineering institutes are working towards providing a platform that helps students to develop skill sets and also to develop capabilities to survive in this ever-changing world of technology. With the existence of innumerable tech institutes, it becomes bewildering for the students and parents to choose the right institute which are making efforts in the right direction to constantly match up with the advancements in the industry.

Civil Services Chronicle intends to make this process easier for you and hence has prepared a credible and reliable ranking of the Engineering Colleges in India based on inputs from professionals handling admission procedures, placements, HR and Corporate relations in business. You will be able to identify institutes based on your own criteria of an ideal Engineering College on an overall basis 10th All-India Engineering Colleges Survey 2022 as well as based on certain factors such as placements, curriculum, industry exposure, and perceptions of students, academia and other relevant entities.

How we chose the best institutes?

A. Desk Research and Factual Data Collection

List of engineering institutes was prepared and they were requested to participate by sending the filled-in questionnaire forms and supporting documents. As per the changing scenario of the tech education, weights of parameters had to be modified as some new subparameters like skill upgradation, importance given to incubation centers and international collaborations were introduced.

B. Validation of Data through Physical Survey

The research team of Chronicle visited numerous engineering institutes which have participated in the survey. The team interacted with the directors, faculty members, current students, academicians. The data was validated and different parameters were critically analyzed.

C. Analysis: Final Ranking of the Institutes

Perceptual Score: Ratings on various parameters for each institute calculating importance of various parameters to arrive at weights for each parameter by using a regression model.

Factual Score: The information collected corresponded to similar parameters as in the perceptual survey. A detailed scoring system was developed for each parameter. The final score for a engineering institutes was an average of Perception Score and Factual Scoreequal weight age (50:50) was given to both.
