Curriculum and Syllabi
(As approved by the 24th Academic Council
- August 2025)

B.Tech.
(Information Technology)

REGULATIONS 2025

CURRICULUM AND SYLLABI (I & II semesters)
(as approved by the 24th Academic Council - August 2025)

B.TECH. INFORMATION TECHNOLOGY

VISION AND MISSION OF THE INSTITUTION

VISION

B.S. Abdur Rahman Crescent Institute of Science and Technology aspires to be a leader in Education, Training and Research in multidisciplinary areas of importance and to play a vital role in the Socio- Economic progress of the Country in a sustainable manner.

MISSION

- To blossom into an internationally renowned Institute.
- To empower the youth through quality and value-based education.
- To promote professional leadership and entrepreneurship.
- To achieve excellence in all its endeavors to face global challenges.
- To provide excellent teaching and research ambience.
- To network with global Institutions of Excellence, Business, Industry and Research Organizations.
- To contribute to the knowledge base through Scientific enquiry, Applied Research and Innovation.

DEPARTMENT OF INFORMATION TECHNOLOGY

VISION AND MISSION

VISION

- To be a leader in providing quality education and training in the field of Information Technology at Undergraduate and Postgraduate levels and undertake Research activities thereby contributing to the progress of the country.

MISSION

- To impart quality education and inculcate professionalism to suit the needs of the industries and society.
- To involve graduates in undertaking need based Research activities and disseminate the knowledge to develop entrepreneurial skills.
- To improve the professionalism through extension activities, industrial visits and in-plant training.
- To improve communicate effectively both in documentation and presentation.
- To create awareness of social, economic responsibilities ethically.

PROGRAMME EDUCATIONAL OBJECTIVES AND OUTCOMES

B.TECH. INFORMATION TECHNOLOGY

PROGRAMME EDUCATIONAL OBJECTIVES:

- **PEO1:** To provide students with core competence in mathematics, science and engineering concepts essential to formulate, analyze and solve hardware / software engineering problems.
- **PEO2:** To impart students with good breadth of knowledge in the core areas of information technology and related engineering so as to comprehend engineering trade-offs, analyze, design and synthesize data and technical concepts to create novel products and solutions for the real time problems.
- **PEO3:** To train students in the use of tools and techniques for software development in different application domains and to grow as an entrepreneur.
- **PEO4:** To prepare students to apply their knowledge and multifaceted skills to get immediate employment and excel in IT professional careers or awareness of the lifelong learning needed to continue their education in IT or related post graduate programmes to perform excellence, leadership and demonstrate good citizenship.
- **PEO5:** To inculcate in students to maintain high professionalism and ethical standards, effective oral and written communication skills, to work as part of teams on multidisciplinary projects and diverse professional environments, and relate engineering issues to the society, global economy and to emerging technologies.

PROGRAMME OUTCOMES:

On successful completion of the programme, the graduates will

- PO1: Engineering Knowledge: Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop to the solution of complex engineering problems.
- PO2: Problem Analysis: Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions with consideration for sustainable development. (WK1 to WK4)
- PO3: Design/Development of Solutions: Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required. (WK5)
- PO4: Conduct Investigations of Complex Problems: Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions. (WK8).
- PO5: Engineering Tool Usage: Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems. (WK2 and WK6)
- PO6: The Engineer and The World: Analyze and evaluate societal and environmental aspects while solving complex engineering problems for its impact on sustainability with reference to economy, health, safety, legal framework, culture and environment. (WK1, WK5, and WK7).
- PO7: Ethics: Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws. (WK9)
- PO8: Individual and Collaborative Team work: Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams.
- PO9: Communication: Communicate effectively and inclusively within the engineering community and society at large, such as being able to

comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences PO10: Project Management and Finance: Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments.

- PO11: Life-Long Learning: Recognize the need for, and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change. (WK8)

PROGRAMME SPECIFIC OUTCOMES:

- **PSO1:** impart broad spectrum of knowledge and skill in the analysis, design, implementation and testing of software systems.
- **PSO2:** provide problem solving capability through IT tools and techniques with adequate hands on experience to meet industry / research / societal needs.

REGULATIONS – 2025**B.TECH. DEGREE PROGRAMMES*****(Under Choice Based Credit System)*****1.0 PRELIMINARY DEFINITIONS & NOMENCLATURE**

In these Regulations, unless the context otherwise requires:

- i) **"Programme"** means B.Tech. Degree Programme.
- ii) **"Branch"** means specialization or discipline of B.Tech. Degree Programme like Civil Engineering, Mechanical Engineering, etc.,
- iii) **"Course"** means theory / practical / laboratory integrated theory / seminar / internship / project and any other subject that is normally studied in a semester like English, Mathematics, Environmental Science, Engineering Graphics, Electronic Devices etc.,
- iv) **"Institution"** means B.S. Abdur Rahman Crescent Institute of Science and Technology.
- v) **"Academic Council"** means the Academic Council, which is the apex body on all academic matters of this Institute.
- vi) **"Dean (Academic Affairs)"** means the Dean (Academic Affairs) of the Institution who is responsible for the implementation of relevant rules and regulations for all the academic activities.
- vii) **"Dean (Student Affairs)"** means the Dean (Students Affairs) of the Institution who is responsible for activities related to student welfare, conduct of co-curricular, extra-curricular events and discipline in the campus.
- viii) **"Controller of Examinations"** means the Controller of Examinations of the Institution who is responsible for the conduct of examinations and declaration of results.
- ix) **"Dean of the School"** means the Dean of the School of the department concerned.
- x) **"Head of the Department"** means the Head of the Department concerned.

2.0 ADMISSION

2.1a) Candidates for admission to the first semester of the eight semester B. Tech. degree programme shall be required to have passed the Higher Secondary Examination of the 10+2 curriculum (Academic stream) prescribed by the appropriate authority or any other examination of any University or authority accepted by the Institution as equivalent thereto. Grade 12 or equivalent stage of education (Level 4) as per NEP 2020.

2.1b) The student shall have studied at least any three of the following courses: Physics, Mathematics, Chemistry, Computer Science, Electronics, Information Technology, Biology, Informatics Practices, Biotechnology, Technical Vocational Subjects, Agriculture, Engineering Graphics, Business Studies, Entrepreneurship at 10+2 level. In case if the student has not studied any or all the courses viz., mathematics, physics and chemistry, he / she shall undergo bridge course(s) in the concerned course(s) at 10+2 level knowledge (Level 4 of NEP 2020).

2.2 Notwithstanding the qualifying examination, the candidate might have passed at 10+2, the candidate shall also write an entrance examination prescribed by the Institution for admission to certain programmes. The entrance examination shall test the proficiency of the candidate in the courses considered eligible for admission on the standards prescribed for 10+2 academic stream.

2.3 Candidates for admission to the third semester of the eight semester B.Tech. programme under lateral entry category shall be required to have passed minimum Three years / Two years (Lateral Entry) Diploma examination in any branch of Engineering / Technology or passed B.Sc. Degree from a recognized University as defined by UGC and passed 10+2 examination with Mathematics as a subject or Passed three year Diploma of Vocation Stream (D.Voc) in the same or allied sector or any other examination of any other authority accepted by the Institution as equivalent thereto.

- 2.4** The Institution shall offer suitable bridge courses in Mathematics, Physics, Engineering drawing, etc., for the students of diverse backgrounds.
- 2.5** The eligibility criteria such as marks, number of attempts and physical fitness shall be as prescribed by the Institution in adherence to the guidelines of regulatory authorities from time to time.
- 2.6** The eligibility and admission criteria prescribed by the respective programme regulating bodies shall be strictly followed for the selection and admission of candidates to the specific programmes.

3.0 BRANCHES OF STUDY

- 3.1** Regulations are applicable to the following B.Tech. Degree programmes in various branches of Engineering and Technology, each distributed over eight semesters, with two semesters per academic year.

1. Aeronautical Engineering
2. Artificial Intelligence and Data Science
3. Automobile Engineering
4. Biotechnology
5. Civil Engineering
6. Computer Science and Engineering
7. Computer Science and Engineering (Cyber Security)
8. Computer Science and Engineering (Internet of Things)
9. Computer Science and Engineering (Artificial Intelligence and Machine Learning)
10. Electrical and Electronics Engineering
11. Electronics and Communication Engineering
12. Electronics and Computer Engineering
13. Electronics and Instrumentation Engineering
14. Information Technology
15. Mechanical Engineering

16. Polymer Engineering

4.0 STRUCTURE OF THE PROGRAMME

4.1 Every programme has a curriculum with syllabi consisting of theory and practical courses as per AICTE such as,

- i) Basic Science Courses - BSC
- ii) Humanities and Social Sciences including Management Courses - HSC
- iii) Engineering Science Courses - ESC
- iv) Professional Core Courses - PCC
- v) Professional Elective Courses - PEC
- vi) Open Elective Courses - OEC
- vii) Laboratory Courses – LC
- viii) Laboratory Integrated Theory Courses – LITC
- ix) Mandatory Non Credit Courses- MNC
- x) Project - PROJ (Project work, seminar and internship in industry or at appropriate workplace)

4.1.1 Mandatory Induction Programme for First Year Students

The first year students upon admission shall undergo a mandatory three-week Induction programme consisting of physical activity, creative arts, universal human values, literary, proficiency modules, lectures by eminent people, visits to local areas, familiarization with departments / schools and centres, etc.,

4.1.2 Personality and Character Development

All students shall enroll, on admission, in any of the following personality and character development programmes or in departmental societies:

- National Cadet Corps (NCC)
- National Service Scheme (NSS)
- National Sports Organization (NSO)
- Youth Red Cross (YRC)
- Rotaract

- Crescent Indian Society Training Development (ISTD – C)
- Crescent Creative Strokes
- Crescent Technocrats club

The training activities / events / camp shall normally be organized during the weekends / vacation period.

4.1.3 Online Courses for Credit Transfer

Students are permitted to undergo department approved online courses under SWAYAM up to 40% of credits of courses in a semester excluding project semester with the recommendation of the Head of the Department / Dean of School and with the prior approval of Dean (Academic Affairs) during his / her period of study. The credits earned through online courses ratified by the respective Board of Studies shall be transferred following the due approval procedures. The online courses can be considered in lieu of core courses and elective courses.

4.1.4 Value Added Courses

The students are permitted to pursue department approved online courses (excluding courses registered for credit transfer) or courses offered / approved by the department as value added courses.

The details of the value added course viz., syllabus, schedule of classes and the course faculty shall be sent to the Dean (Academic Affairs) for approval. The students may also undergo the value added courses offered by other departments with the consent of the Head of the Department offering the course.

These value added courses shall be specified in the consolidated mark sheet as additional courses pursued by the student over and above the curriculum during the period of study.

4.1.5 Industry Internship

The students shall undergo training for a period as specified in the curriculum during the summer vacation in any industry relevant to the field of study.

The students are also permitted to undergo internship at research

organizations / eminent academic institutions for the period prescribed in the curriculum during the summer vacation, in lieu of Industrial training.

In any case, the student shall obtain necessary approval from the Head of the Department / Dean of School and the training has to be taken up at a stretch.

4.1.6 Industrial Visit

The student shall undergo at least one industrial visit every year from the second year of the programme. The Heads of Departments / Deans of Schools shall ensure the same.

4.2 Each course is normally assigned certain number of credits:

- one credit per lecture period per week
- one credit per tutorial period per week
- one credit for two to three periods and two credits for four periods of laboratory or practical sessions per week
- one credit for two periods of seminar / project work per week
- one credit for two weeks of industrial training or 80 hours per semester.

4.3 Each semester curriculum shall normally have a blend of lecture courses, laboratory courses, laboratory integrated theory courses, etc.

4.4 The medium of instruction, examinations and project report shall be in English, except for courses in languages other than English.

5.0 DURATION OF THE PROGRAMME

5.1 A student is expected to complete the B.Tech. programme in eight semesters (six semesters in the case of lateral entry scheme), but in any case not more than 14 continuous semesters reckoned from the date of first admission (12 semesters in the case of lateral entry students).

5.2 Each semester shall consist of a minimum of 90 working days

including the days of examinations.

- 5.3** The maximum duration for completion of the programme as mentioned in clause 5.1 shall also include period of break of study vide clause 7.1 so that the student may be eligible for the award of the degree.

6.0 REGISTRATION AND ENROLLMENT

- 6.1** The students of first semester shall register and enroll for courses at the time of admission by paying the prescribed fees. For the subsequent semesters registration for the courses shall be done by the student one week before the last working day of the previous semester.

6.2 Change of an Elective Course

A student can change an enrolled elective course within 10 working days from the commencement of the course, with the approval of the Dean (Academic Affairs), on the recommendation of the Head of the Department of the student.

6.3 Withdrawal from a Course

A student can withdraw from an enrolled course at any time before the first continuous assessment test for genuine reasons, with the approval of the Dean (Academic Affairs), on the recommendation of the Head of the Department of the student.

7.0 BREAK OF STUDY FROM PROGRAMME

- 7.1** A student may be allowed / enforced to take a break of study for two semesters from the programme with the approval of Dean (Academic Affairs) for the following reasons:

7.1.1 Medical or other valid grounds

7.1.2 Award of 'I' grade in all the courses in a semester due to lack of attendance

7.1.3 Debarred due to any act of indiscipline

- 7.2** The total duration for completion of the programme shall not exceed

the prescribed maximum number of semesters (vide clause 5.1).

7.3 A student who has availed a break of study in the current semester (odd/even) can rejoin only in the subsequent corresponding (odd/even) semester in the next academic year on approval from the Dean (Academic affairs).

7.4 During the break of study, the student shall not be allowed to attend any regular classes or participate in any activities of the Institution. However, he / she shall be permitted to enroll for the 'I' grade courses and appear for the arrear examinations.

8.0 CLASS ADVISOR AND FACULTY ADVISOR

8.1 Class Advisor

A faculty member shall be nominated by the Head of the Department as class advisor for the class throughout the period of study except first year.

The class advisor shall be responsible for maintaining the academic, curricular and co-curricular records of students of the class throughout their period of study.

However, for the first and second semester, the class advisors (first year class advisors) are nominated by the first year coordinator.

8.2 Faculty Advisor

To help the students in planning their courses of study and for general counseling, the Head of the Department of the students shall attach a maximum of 20 students to a faculty member of the department who shall function as faculty advisor for the students throughout their period of study. Such faculty advisor shall guide the students in taking up the elective courses for registration and enrolment in every semester and also offer advice to the students on academic and related personal matters.

9.0 COURSE COMMITTEE

9.1 Each common theory course offered to more than one group of students shall have a “Course Committee” comprising all the course faculty teaching the common course with one of them nominated as a course coordinator. The nomination of the course coordinator shall be made by the Head of the Department / Dean (Academic Affairs) depending on whether all the course faculty teaching the common course belong to a single department or from several departments. The course committee shall ensure preparation of a common question paper and scheme of evaluation for the tests and semester end examination.

10.0 CLASS COMMITTEE

A class committee is constituted branch wise and semester wise by the Head of the Department / Dean of the School shall normally comprise of faculty members handling the courses, student representatives and a senior faculty member not handling any courses for that class as chairman.

10.1 The composition of class committees for first and second semester is as follows:

- i) The first year coordinator shall be the chairman of the class committee
- ii) Faculty members of all individual courses of first / second semester
- iii) Six student representatives (male and female) of each class nominated by the first year coordinator
- iv) The class advisor and faculty advisors of the class

10.2 The composition of the class committee for each branch from 3rd to 8th semester is as follows:

- i) One senior faculty member preferably not handling courses for the concerned semester appointed as chairman by the Head of the Department
- ii) All the faculty members handling courses of the semester

- iii) Six student representatives (male and female) of each class nominated by the Head of the Department in consultation with the relevant faculty advisors
- iv) All faculty advisors and the class advisors
- v) Head of the Department

10.3 The class committee shall meet at least three times during the semester. The first meeting shall be held within two weeks from the date of commencement of classes, in which the components of continuous assessment for various courses and the weightages for each component of assessment shall be decided for the first and second assessment. The second meeting shall be held within a week after the date of first assessment report, to review the students' performance and for follow up action.

10.4 During these two meetings, the student members shall meaningfully interact and express opinions and suggestions to improve the effectiveness of the teaching-learning process, curriculum and syllabi, etc.

10.5 The third meeting of the class committee, excluding the student members, shall meet after the semester end examinations to analyse the performance of the students in all the components of assessments and decide their grades in each course. The grades for a common course shall be decided by the concerned course committee and shall be presented to the class committee(s) by the course faculty concerned.

11.0 CREDIT LIMIT FOR ENROLLMENT & MOVEMENT TO HIGHER SEMESTER

11.1 A student can enroll for a maximum of 36 credits during a semester including Redo / Predo courses.

11.2 The minimum credits earned by the student to move to 7th semester shall not be less than 60 credits (40 credits for lateral entry

students).

12.0 ASSESSMENT PROCEDURE AND PERCENTAGE WEIGHTAGE OF MARKS

12.1 Every theory course shall have a total of three assessments during a semester as given below:

Assessments	Course Coverage in Weeks	Duration	Weightage of Marks
Assessment 1	1 to 6	1.5 hours	25%
Assessment 2	7 to 12	1.5 hours	25%
Semester End Examination	Full course	3 hours	50%

12.2 Theory Course

Appearing for semester end theory examination for each course is mandatory and a student shall secure a minimum of 40% marks in each course in semester end examination for the successful completion of the course.

12.3 Laboratory Course

Every practical course shall have 60% weightage for continuous assessments and 40% for semester end examination. However, a student shall have secured a minimum of 50% marks in the semester end practical examination for the award of pass grade.

12.4 Laboratory Integrated Theory (LIT) Courses

For laboratory integrated theory courses, the theory and practical components shall be assessed separately for 100 marks each and consolidated by assigning a weightage of 75% for theory component and 25% for practical component (for a 4 credit LIT course). Grading shall be done for this consolidated mark. Assessment of theory components shall have a total of three assessments with two continuous assessments carrying 25% weightage each and semester end examination carrying 50% weightage. The student shall secure a separate minimum of 40% in

the semester end theory examination. The evaluation of practical components shall be through continuous assessment.

Component	Maximum Marks	Weightage for Final Grade	Mode of Assessment
Theory Component	100	75%	CAT1 (25%) + CAT2 (25%) + SEE (50%)
Practical Component	100	25%	Continuous assessment only
Final Grade Basis	Consolidated	100%	75% Theory + 25% Practical
Pass Requirement	-	-	Minimum 40% in Semester-End Theory Exam (SEE)

Note:

1. Proportionate weightage shall be assigned to LIT courses based on their credit value, whether 2 or 3 credits.
2. In Lab-Integrated Professional Elective courses, the laboratory component shall be assessed by the course faculty.

12.5 The components of continuous assessment for theory / practical / laboratory integrated theory courses shall be finalized in the first class committee meeting.

12.6 Industry Internship

In the case of industry internship, the student shall submit a report, which shall be evaluated along with an oral examination by a committee of faculty members constituted by the Head of the Department. The student shall also submit an internship completion certificate issued by the industry / research / academic organisation. The weightage of marks for industry internship report and viva voce examination shall be 60% and 40% respectively.

12.7 Project Work (Mini and Capstone Project)

Mini project work, shall be carried out individually or as a group

activity involving a maximum of four students.

Each group shall identify a suitable topic within their domain, either disciplinary or interdisciplinary, based on the students' abilities and in consultation with the faculty mentor. The topic must lead to the development of a small-scale system or application.

The progress of the mini project shall be evaluated through three periodic reviews: two interim reviews and one final review. A project report shall be submitted by the end of the semester. The reviews shall be conducted by a committee of faculty members constituted by the Head of the Department / Dean of the School.

An oral examination (viva voce) shall be conducted as the semester-end examination by an internal examiner approved by the Controller of Examinations, based on the project report.

The weightage for assessment shall be as follows:

- Periodic Reviews: 50%
 - 25% by the Project Guide
 - 25% by the Review Committee
- Project Report: 20%
- Viva Voce Examination: 30%

In the case of capstone project work, the project shall be carried out individually or as a group activity, involving a maximum of three or four students.

A committee of faculty members, constituted by the Head of the Department / Dean of the School, shall conduct three periodic reviews during the semester to monitor and assess the progress of the project.

At the end of the semester, students shall submit a project report, based on which a semester-end oral examination (viva voce) shall be conducted by an external examiner approved by the Controller of Examinations.

The assessment weightage shall be as follows:

- Periodic Reviews – 50%

- 25% by the Project Guide
- 25% by the Review Committee
- Project Report – 20%
- Viva Voce Examination – 30%.

12.8 Assessment of seminars and comprehension shall be carried out by a committee of faculty members constituted by the Head of the Department.

12.9 For the first attempt of the arrear theory examination, the internal assessment marks scored for a course during first appearance shall be used for grading along with the marks scored in the arrear examination. From the subsequent appearance onwards, full weightage shall be assigned to the marks scored in the semester end examination and the internal assessment marks secured during the course of study shall become invalid.

In case of laboratory integrated theory courses, after one regular and one arrear appearance, the internal mark of theory component is invalid and full weightage shall be assigned to the marks scored in the semester end examination for theory component. **There shall be no arrear or improvement examination for lab components.**

13.0 SUBSTITUTE EXAMINATIONS

13.1 A student who is absent, for genuine reasons, may be permitted to write a substitute examination for any one of the two continuous assessment tests of a course by paying the prescribed substitute examination fee. However, permission to take up a substitute examination will be given under exceptional circumstances, such as accidents, admission to a hospital due to illness, etc. by a committee constituted by the Head of the Department / Dean of the School for that purpose. There is no substitute examination for semester end examinations.

13.2 A student shall apply for a substitute exam in the prescribed form to the Head of the Department / Dean of the School within a week

from the date of assessment test. However, the substitute examination will be conducted only after the last instructional day of the semester.

14.0 ATTENDANCE REQUIREMENT AND SEMESTER / COURSE REPETITION

14.1 A student shall earn 100% attendance in the scheduled contact hours (such as lectures, tutorials, labs, etc.) for that course. However, a **relaxation** of up to 25% in attendance may be granted to account for valid reasons such as medical emergencies, participation in co-curricular or extracurricular activities with prior approval, or other genuine circumstances.

If a student's attendance falls below 75% in a particular course, even after considering the permissible relaxation, they will not be allowed to appear for the semester-end examination in that course. Instead, the student will be awarded an "I" grade (Incomplete) for the course.

14.2 The faculty member of each course shall cumulate the attendance details for the semester and furnish the names of the students who have not earned the required attendance in the concerned course to the class advisor. The class advisor shall consolidate and furnish the list of students who have earned less than 75% attendance, in various courses, to the Dean (Academic Affairs) through the Head of the Department / Dean of the School. Thereupon, the Dean (Academic Affairs) shall officially notify the names of such students prevented from writing the semester end examination in each course.

14.3 If a student's attendance in any course falls between 65% and 75% due to medical reasons (e.g., hospitalization, illness) or participation in institution-approved events, they may be granted exemption from the minimum attendance requirement and allowed to appear for the semester-end exam. The student must submit valid documents to the

class advisor upon rejoining, with approval from the HoD/Dean. Final approval for **condonation** will be granted by the Vice Chancellor based on the Dean (Academic Affairs)'s recommendation.

14.4 A student who has obtained an “I” grade in all the courses in a semester is not permitted to move to the next higher semester. Such students shall **repeat** all the courses of the semester in the subsequent academic year.

14.5 The student awarded “I” grade, shall enroll and repeat the course when it is offered next. In case of “I” grade in an elective course either the same elective course may be repeated or a new elective course may be taken with the approval of the Head of the Department / Dean of the School.

14.6 A student who is awarded “U” grade in a course shall have the option to either write the semester end arrear examination at the end of the subsequent semesters, or to **redo** the course when the course is offered by the department. Marks scored in the continuous assessment in the redo course shall be considered for grading along with the marks scored in the semester end (redo) examination. If any student obtains “U” grade in the redo course, the marks scored in the continuous assessment test (redo) for that course shall be considered as internal mark for further appearance of arrear examination.

14.7 If a student with “U” grade, who **prefers to redo** any particular course, fails to earn the minimum 75% attendance while doing that course, then he / she is not permitted to write the semester end examination and his / her earlier “U” grade and continuous assessment marks shall continue.

15.0 REDO / PRE-DO COURSES

15.1 A student can register for a maximum of three redo courses per semester without affecting the regular semester classes, whenever such courses are offered by the concerned department, based on

the availability of faculty members and subject to a specified minimum number of students registering for each of such courses.

15.2 The number of contact hours and the assessment procedure for any redo course shall be the same as regular courses, except there is **no provision for any substitute examination and withdrawal from a redo course.**

15.3 A student shall be permitted to pre-do a course offered by the concerned department, provided it does not affect the regular semester class schedule. Such permission shall be granted based on the availability of faculty members, the maximum permissible credit limit of the semester, and the student's fulfillment of the necessary prerequisites for the course. The proposal shall be recommended by the Dean of the School and the Head of the Department, and shall require final approval from the Dean (Academic Affairs).

16.0 PASSING AND DECLARATION OF RESULTS AND GRADE SHEET

16.1 All assessments of a course shall be made on absolute marks basis.

The class committee without the student members shall meet to analyse the performance of students in all assessments of a course and award letter grades following the relative grading system. The letter grades and the corresponding grade points are as follows:

Letter Grade	Grade Points
S	10
A	9
B	8
C	7
D	6
E	5
U	0
W	-
I	-

PA	-
FA	-

- "W"- denotes withdrawal from the course
- "I" - denotes "Incomplete" ie. inadequate attendance in the course and prevention from appearance of semester end examination
- "U" - denotes unsuccessful performance in the course.
- "PA" - denotes the 'Pass' of the zero credit courses.
- "FA" - denotes the 'Fail' of the zero credit courses.

16.2 A student who earns a minimum of five grade points ('E' grade) in a course is declared to have successfully completed the course. Such a course cannot be **repeated by the student for improvement of grade.**

16.3 Upon awarding grades, the results shall be endorsed by the chairman of the class committee and Head of the Department / Dean of the School. The Controller of Examinations shall further approve and declare the results.

16.4 Within one week from the date of declaration of result, a student can apply for revaluation of his / her semester end theory examination answer scripts of one or more courses, on payment of prescribed fee, through proper application to the Controller of Examinations. Subsequently, the Head of the Department / Dean of the School offered the course shall constitute a revaluation committee consisting of chairman of the class committee as convener, the faculty member of the course and a senior faculty member having expertise in that course as members. The committee shall meet within a week to revalue the answer scripts and submit its report to the Controller of Examinations for consideration and decision.

16.5 After results are declared, grade sheets shall be issued to each student, which contains the following details: a) list of courses

enrolled during the semester including redo courses / arrear courses, if any; b) grades scored; c) Grade Point Average (GPA) for the semester and d) Cumulative Grade Point Average (CGPA) of all courses enrolled from the first semester onwards.

GPA is the ratio of the sum of the products of the number of credits of courses registered and the grade points corresponding to the grades scored in those courses, taken for all the courses, to the sum of the number of credits of all the courses in the semester.

If C_i is the number of credits assigned for the i^{th} course and GP_i is

$$GPA = \frac{\sum_{i=1}^n (C_i)(GP_i)}{\sum_{i=1}^n C_i}$$

the Grade Point in the i^{th} course,

Where n = number of courses

The Cumulative Grade Point Average (CGPA) is calculated in a similar manner, considering all the courses enrolled from first semester.

“I”, “W”, “PA” and “FA” grades are excluded for calculating GPA.

“U”, “I”, “W”, “PA” and “FA” grades are excluded for calculating CGPA.

The formula for the conversion of CGPA to equivalent percentage of marks shall be as follows:

Percentage equivalent of marks = CGPA X 10

16.6 After successful completion of the programme, the degree shall be awarded to the students with the following classifications based on CGPA.

Classification	CGPA
First Class with Distinction	8.50 and above and passing all the courses in first appearance and completing the programme within the prescribed period of 8 semesters for all students (except lateral entry students) and 6 semesters for lateral

	entry students
First Class	6.50 and above and completing the programme within a maximum of 10 semesters for all students (except lateral entry students) and 8 semesters for lateral entry students
Second Class	Others

16.6.1 Eligibility for First Class with Distinction

- A student should not have obtained 'U' or 'I' grade in any course during his/her study
- A student should have completed the UG programme within the minimum prescribed period of study (except clause 7.1.1)

16.6.2 Eligibility for First Class

- A student should have passed the examination in all the courses not more than two semesters beyond the minimum prescribed period of study (except clause 7.1.1)

16.6.3 The students who do not satisfy clause 16.6.1 and clause 16.6.2 shall be classified as second class.

16.6.4 The CGPA shall be rounded to two decimal places for the purpose of classification. The CGPA shall be considered up to three decimal places for the purpose of comparison of performance of students and ranking.

17.0 SUPPLEMENTARY EXAMINATION

Final year students and passed out students can apply for supplementary examination for a maximum of **three** courses thus providing an opportunity to complete their degree programme. Likewise, students with less credits in VI semester can also apply for supplementary examination for a maximum of **three** courses to enable them to earn minimum credits to move to higher semester. The students can apply for supplementary examination within three

weeks of the declaration of results in the **even semester**.

18.0 DISCIPLINE

18.1 Every student is expected to observe discipline and decorum both inside and outside the campus and not to indulge in any activity which tends to affect the reputation of the Institution.

18.2 Any act of indiscipline of a student, reported to the Dean (Student Affairs), through the Head of the Department / Dean of the School concerned shall be referred to a Discipline and Welfare Committee constituted by the Registrar for taking appropriate action.

19.0 MULTI ENTRY AND MULTI EXIT (MEME) FRAMEWORK

In accordance with the provisions of the National Education Policy (NEP) 2020, the programme shall support a Multi Entry – Multi Exit (ME-ME) framework to provide flexibility in the academic pathway of students.

19.1 Exit Option:

19.1.1 Credit Requirement for Award of B.Tech. Degree

To qualify for the award of a B.Tech. degree from the Institute, a student must successfully complete the total credit requirements as prescribed in the approved curriculum of the respective programme. The specific credit requirements are determined by the programme curriculum.

19.1.2 Provision for Multiple Exit

In alignment with NEP 2020 guidelines, the Institute provides students enrolled in undergraduate programmes with the option of multiple exits, subject to the following conditions:

a. Exit at the End of First or Second Year

Students may choose to exit the programme at the end of either the first year or the second year, provided they have fulfilled the prescribed academic requirements.

b. Application for Exit

A student intending to exit must submit a formal written application in the prescribed format at least **eight weeks prior to the scheduled end of the academic year**.

c. Departmental Recommendation

1. Upon receipt of the application, the concerned Department shall evaluate the academic record of the student and recommend the award of a **Certificate or Diploma** as applicable, based on the credits earned.
2. In the case of arrear courses, the Certificate/Diploma will be conferred only after successful clearance of all pending arrears.

d. Notification of Completion

Once a student has fulfilled the requirements for the award of Certificate/Diploma, the Department shall notify the same to Controller of Examinations for further processing and issuance.

19.1.3 Award of Qualifications under Multiple Exit Scheme

1. **Certificate:** Awarded after successful completion of the first year, subject to earning the minimum prescribed first-year credits as per respective curriculum along with a **3-credit Skill Based Course**.
2. **Diploma:** Awarded after successful completion of the second year, subject to earning the minimum prescribed cumulative credits as per the respective curriculum (e.g., 44 credits from the first year + 42 credits from the second year) along with **6 credits of Skill Based Courses**.

19.1.4 Conditions Governing Exit

1. The multiple exit facility is intended strictly for **genuine and exceptional circumstances**, such as prolonged illness, or

securing an employment opportunity necessitating a temporary withdrawal from the programme.

2. Students opting for a temporary exit after the first or second year must obtain **prior approval from the Registrar through the Dean (Academics)**, based on the recommendation of the respective Head of the Department.

19.1.5 Expectation of Programme Continuity

While the option for multiple exits exists, it is generally expected that students admitted to a B.Tech. programme shall pursue their studies continuously until completion of the final degree requirements.

19.2. Entry Option:

Students seeking re-entry into the programme (multi-entry) must submit an application through the proper channel at the beginning of the odd semester. Admission shall be subject to fulfilment of institutional guidelines, credit mapping, and availability of seats.

19.3. Credits Requirement for the Certifications:

Name of the Certificate Programme	Required
Certificate (Level 4.5 as per NEP 2020)	40* - 45
Diploma (Level 5 as per NEP 2020)	80* - 87

* The minimum number of credits that a student must earn (as per the respective curriculum) in order to get the above certification program.

20 ELIGIBILITY FOR THE AWARD OF DEGREE

20.1 A student shall be declared to be eligible for the award of B.Tech. degree provided the student has:

- 20.1.1 Successfully earned the required number of total credits as specified in the curriculum of the programme of study within a maximum period of 14 semesters (12 semesters for lateral entry)

from the date of admission, **including break of study**.

20.1.2 Successfully completed the requirements of the enrolled professional development activity through various institute level clubs or department level membership in societies.

20.1.3 No dues to the Institution, Library, Hostel, etc.

20.1.4 No disciplinary action pending against him/her.

20.2 The award of the degree must have been approved by the Institution.

21 MINOR DEGREE PROGRAMMES OFFERED FOR STUDENTS

21.1 The students admitted in the following B.Tech. programmes can graduate with a minor degree, which is optional, along with a major degree.

21.2 The eligibility for choosing the minor degree is given as below:

Sl. No.	Minor Degree	Eligible Major Degree Programmes (from other Departments)	Offering Dept.
1.	Artificial Intelligence and Machine Learning	Mechanical Engineering Aeronautical Engineering Polymer Engineering Automobile Engineering	CSE
2.	Block Chain	Civil Engineering	CSE
3.	Cyber Security	Biotechnology	IT
4.	Data Science	Electrical and Electronics Engg.	CSE
5.	Internet of Things (IoT)	Electronics and Instrumentation Engg.	ECE

Sl. No.	Minor Degree	Eligible Major Degree Programmes (from other Departments)	Offering Dept.
6.	Virtual & Augmented Reality	Mechanical Engineering Aeronautical Engineering Polymer Engineering Automobile Engineering Civil Engineering Biotechnology Electrical and Electronics Engg. Electronics and Instrumentation Engg. Electronics and Communication Engg.	CSE
7.	Sensor Technology	Mechanical Engineering Aeronautical Engineering Polymer Engineering Automobile Engineering Civil Engineering Biotechnology Electrical and Electronics Engg.	IT
8.	Robotics	Artificial Intelligence and Data Science Computer Science and Engg. (AIML) Computer Science and Engg.(CS) Computer Science and Engg.(IoT) Computer Science and Engineering Information Technology Civil Engineering Biotechnology Electrical and Electronics Engg. Electronics and Instrumentation Engg.	Mech.

Sl. No.	Minor Degree	Eligible Major Degree Programmes (from other Departments)	Offering Dept.
9.	3D Printing	Artificial Intelligence and Data Science Computer Science and Engineering Computer Science and Engg. (AIML) Computer Science and Engg. (CS) Computer Science and Engg. (IoT) Information Technology Biotechnology Electrical and Electronics Engg. Electronics and Instrumentation Engg. Electronics and Communication Engg.	Mech.
10.	Electric Vehicles	Artificial Intelligence and Data Science Computer Science and Engineering Computer Science and Engg.(AIML) Computer Science and Engg.(CS) Computer Science and Engg. (IoT) Information Technology Civil Engineering Biotechnology Electronics and Communication Engg.	EEE
11.	Industrial Automation	Artificial Intelligence and Data Science Computer Science and Engineering Computer Science and Engg. (AIML) Computer Science and Engg. (CS) Computer Science and Engg. (IoT) Computer Science and Engineering Information Technology Mechanical Engineering Aeronautical Engineering Polymer Engineering Automobile Engineering	EIE

Sl. No.	Minor Degree	Eligible Major Degree Programmes (from other Departments)	Offering Dept.
		Civil Engineering Biotechnology Electronics and Communication Engg.	
12.	GIS and Remote Sensing	Artificial Intelligence and Data Science Computer Science and Engg. (AIML) Computer Science and Engg. (CS) Computer Science and Engg. (IoT) Computer Science and Engineering Information Technology Mechanical Engineering Aeronautical Engineering Polymer Engineering Automobile Engineering Biotechnology Electrical and Electronics Engg. Electronics and Instrumentation Engg. Electronics and Communication Engg.	Civil
13.	Computational Biology	Artificial Intelligence and Data Science Computer Science and Engineering Computer Science and Engg. (AIML) Computer Science and Engg. (CS) Computer Science and Engg. (IoT) Information Technology Mechanical Engineering Aeronautical Engineering Polymer Engineering Automobile Engineering Civil Engineering Electrical and Electronics Engg. Electronics and Instrumentation Engg.	Life Sciences

Sl. No.	Minor Degree	Eligible Major Degree Programmes (from other Departments)	Offering Dept.
		Electronics and Communication Engg.	

21.3 A student shall earn an additional 18 to 20 credits for the award of a minor degree.

21.4 A student shall be awarded a minor degree only when he / she completes the requirements for the award of major degree stipulated in the respective programme.

22 POWER TO MODIFY

Notwithstanding all that has been stated above, the Academic Council has the right to modify the above regulations from time to time.

SEMESTER I

ENE 1181	ENGLISH FOR ENGINEERS	L	T	P	C
SDG: 4		3	0	0	3

COURSE OBJECTIVES:

- COB1:** To develop students' listening skills through exposure to diverse media and enhance comprehension and contextual understanding.
- COB2:** To enable students to speak effectively in a range of informal and formal contexts.
- COB3:** To make them analyze academic and technical texts using structured reading techniques.
- COB4:** To enable them to produce organized, purposeful writing for academic and technical use.
- COB5:** To equip students with appropriate use of grammar, and technical and academic vocabulary.

MODULE I**L: 10**

L: Listening to short audio-formal & informal conversations - Select episodes from *Learn English Podcasts*, British Council

S: Self Introduction - Present, Past, and Future framework (suggested by Harvard Business Review)

R: Process of reading: Skimming & Scanning, SQ3R

W: Technical Writing- Developing hints, Paragraph Writing (technical)

Grammar & Vocabulary: Prefixes & Suffixes, Articles, Present tense, Prepositions, Subject – Verb Agreement

MODULE II**L: 10**

L: Listening to podcasts - 1. "The impact of online abuse" from *Tech Life*, BBC sounds, 2. How can AI support designers? from *Technology Podcast*.

S: Telephonic conversations (Enquiring & Complaining)

R: Reading long technical texts - Comprehension passages - Select articles from *IEEE Spectrum*, *Techcrunch.com*

W: Jumbled sentences, Process description– Interpretation of Flow chart, Bar chart, Dialogue writing

Grammar & Vocabulary: Transition words, Past tense, Conjunctions, Wh /Yes or No questions, Modal verbs

MODULE III

L: 9

L: Listening to TED / INK Talks - 1. "The next computer? Your glasses" - Shahramlzadi (TED Talk) 2. "The Society is our Lab" - Sanjay Podder (INK Talk)

S: Extempore-One minute presentation

R: Reading biography (Extracts from 'Profiles', The Hindu, Sunday Edition) / Autobiography / Fiction & Note- making

W: Letter seeking permission for Industrial Visit / symposium, Letter of invitation

Grammar & Vocabulary: Homonyms, Degrees of comparison, Future tense

L: 8

MODULE IV

L: Listening to debates & discussions - 1. "Hydrogen vs Battery: The Future of Our Transport", 2. "Saudi Arabia's Economic Shift to Green Energy" from *The Gen-Z Debate* Podcast.

S: Group presentation on general topics

R: Reading magazines and articles (extracts from 'Sci-Tech', The Hindu, Sunday Edition)

W: Report writing (Industrial visit report), Argumentative writing

Grammar & Vocabulary: Active, Passive & Impersonal passive voice, Phrasal verbs

L: 8

MODULE V

L: Listening to famous speeches - 1. "Commencement Address at Stanford University" by Steve Jobs 2. "The Voice of Women" by Tejaswini Manogna

S: Debates on Contemporary issues (Agreeing & Disagreeing)

R: Blogs - Articles on Technology, Workforce and Industries from *Deloitte Insights*

W: Book Reviews, Product reviews: Select reviews from "theverge.com"

Grammar & Vocabulary: If clauses, Idioms & Phrases

L: 45 ; Total Hours: 45

TEXT BOOKS:

1. Course material by the Department of English

COURSE OUTCOMES:

On completion of the course, students will be able to

- CO1:** Comprehend and interpret a variety of English audio sources.
- CO2:** Perform effectively in self-introductions, discussions, debates, and collaborative speaking activities.
- CO3:** Extract relevant information and evaluate content from technical and academic texts using reading strategies.
- CO4:** Construct academic and technical documents with clarity and coherence.
- CO5:** Use appropriate vocabulary and grammar in oral and written tasks.

Board of Studies (BoS):

18th BoS of the Department of English
held on 04.06.2025

Academic Council:

24th AC held on 26.08.2025.

Note: 1 - Low Correlation 2 - Medium Correlation 3 - High Correlation

SDG 4: Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all.

Statement:

The course equips the students with relevant academic and technical communication skills to gain quality employment and entrepreneurial opportunities.

MAE 1181	MATRICES AND DIFFERENTIAL	L	T	P	C
SDG: 4	CALCULUS	3	1	0	4

COURSE OBJECTIVES:

COB1: To introduce eigenvalues and eigenvectors of a matrix.

COB2: To demonstrate the application of differential calculus.

COB3: To bring into the light of functions of several variables and its applications.

COB4: To develop the use of ODE solvable techniques necessary for engineering applications.

COB5: To familiarize in solving partial differential equation of first, second and higher orders.

MODULE I	MATRICES	9+3
-----------------	-----------------	------------

Characteristic equation – Eigenvalues and eigenvectors of a real matrix – Properties of eigenvalues and eigenvectors – Cayley-Hamilton Theorem (without proof) – Orthogonal matrices – Orthogonal transformations of a real symmetric matrix to diagonal form – Reduction of quadratic form to canonical form by orthogonal transformation.

MODULE II	DIFFERENTIAL CALCULUS	9+3
------------------	------------------------------	------------

Curvature – Cartesian and polar coordinates – Centre and radius of curvature – Circle of curvature – Involute and evolute – Envelopes – Evolute as envelope of normals.

MODULE III	FUNCTION OF SEVERAL VARIABLES	9+3
-------------------	--------------------------------------	------------

Functions of two variables – Partial derivatives – Total differential – Differential of implicit functions – Jacobian – Taylor's series expansion for two variables – Maxima and minima – Constrained maxima and minima by Lagrange's multiplier method.

MODULE IV	ORDINARY DIFFERENTIAL EQUATIONS	9+3
------------------	--	------------

Linear differential equations of higher order with constant and variable coefficients – Simultaneous first order linear equations with constant coefficients – Variable coefficients for Euler's type – Equations reducible to homogenous form – Method of variation of parameters.

MODULE V PARTIAL DIFFERENTIAL EQUATIONS**9+3**

Formation of partial differential equations by elimination of arbitrary constants and arbitrary functions – Solution of standard types of first order partial differential equations – Lagrange's linear equation – Linear partial differential equations of second and higher order with constant coefficients.

L – 45; T – 15; TOTAL HOURS – 60**TEXT BOOKS:**

COURSE OUTCOMES: At the end of the course students will be able to

CO1: use the matrix techniques to compute eigenvalues and eigenvectors of a given matrix.

CO2: apply differential calculus in engineering problems.

CO3: differentiate the functions with more than one variable and their applications.

CO4: solve the differential equations with constant and variable coefficients.

CO5: form and solve the partial differential equations.

Board of Studies (BOS):

17th BOS of Department of Mathematics
and Actuarial Science held on 23.06.2025

Academic Council:

24th AC held on 26.08.2025.

CO4	3	2													
CO5	3	2													

Note: 1 - Low Correlation 2 - Medium Correlation 3 - High Correlation

SDG 4 – Quality Education: Ensure inclusive and equitable quality education and promote lifelong opportunities for all.

Learning various mathematical tools will lead to knowledge of applications in Engineering problems.

PHE 1181	ENGINEERING PHYSICS	L	T	P	C
SDG: 4		3	0	2	4

COURSE OBJECTIVES:

COB1: To understand the importance of mechanics and properties of matter.

COB2: To familiarize the concepts of electromagnetic waves.

COB3: To introduce the fundamentals of optics and lasers to students

COB4: To analyze the acoustics of buildings and applications of ultrasonics.

COB5: To correlate the quantum mechanics principles and its impact in its application

MODULE I PROPERTIES OF MATTER AND L- 9 T- 0 P- 0
MECHANICS

Elasticity – Hooke's Law-Elastic Moduli-Stress-strain diagram – Factors affecting elasticity – Poisson's ratio - Twisting couple on a wire – Shaft – Torsion pendulum – Bending moment - Depression on a cantilever – Young's modulus by cantilever Uniform and non-uniform bending – I Shape Girders-Viscosity. M.I of a diatomic molecule - torque – rotational dynamics of rigid bodies – conservation of angular momentum – rotational energy state of a rigid diatomic molecule - gyroscope - torsional pendulum – compound pendulum –Introduction to nonlinear oscillations.

MODULE II ELECTROMAGNETIC WAVES L- 9 T- 0 P- 0

Nature of electromagnetic waves- Properties of EM waves-Coulomb's law, Gauss's law and applications, Electrostatic potential–Biot-Savart Law and its Applications, Ampere's circuital Law – Applications- Faraday's laws of Induction - Maxwell's displacement current - Maxwell's equations – free space - Concept of displacement current- Various types of waves in EM- spectrum -Applications of EM waves.

MODULE III OPTICS AND LASERS**L- 9 T - 0 P- 0**

Refractive index-refraction through different media-diffraction (Fresnel and Fraunhofer) and polarization –double refraction–Nicol prism- Interference-Air Wedge – Michelson's Interferometer – Determination of wavelength of light and thickness of thin transparent sheet-Characteristics of Laser – Spontaneous and Stimulated Emissions – Einstein's Coefficients - Population inversion – Pumping Mechanism – Laser Action – Types of Laser: Nd:YAG laser –CO₂ laser and semiconductor laser - Applications : Laser Materials Processing – Holography-Medical applications.

MODULE IV ACOUSTICS & ULTRASONICS**L-9 T-0 P-0**

Basic requirement for the acoustically good halls - Reverberation and time of reverberation – Sabine's formula for reverberation time - Absorption coefficient and its measurement - Factors affecting the architectural acoustics and their remedy-Sound absorbing materials - Introduction to Ultrasonics - Properties - Production methods – Magnetostriction Oscillator method- Piezoelectric Oscillator method – Detection of Ultrasonics –Thermal method – Piezoelectric method – Kundt's tube method – Applications of Ultrasonics – Acoustic Grating – SONAR – Depth of sea – Velocity of blood flow - Ultrasonic Flaw detector.

MODULE V QUANTUM PHYSICS**L-9 T-0 P-0**

Black body radiation – Planck's theory of radiation – Deduction of Wien's displacement law and Rayleigh – Jean's law from Planck's theory — Dual nature of matter – de-Broglie wavelength – Theory of Compton's effect – Davison and Germer experiment-Schrodinger wave equation – Time independent and time dependent wave equation-Physical significance of wave function — Particle in one dimensional box – Introduction to Quantum computing

PRACTICALS**P : 30****List of Experiments**

1. Determination of rigidity modulus of the given wire using Torsional pendulum.
2. Determination of acceleration due to gravity using compound pendulum.
3. Determination of Young's modulus of the beam by uniform / non-uniform bending method.
4. Determination of Young's modulus of the beam by cantilever method.
5. To determine the frequency of an electrically maintained tuning fork using a vibration generator. (Melde's experiment)
6. Determination of thickness of a thin wire / sheet using Air Wedge method.
7. Determination wavelength of spectral lines of mercury source using spectrometer grating method.
8. Determination of wavelength of laser light using semiconductor laser diffraction.
9. Determination of angle of divergence of a laser beam using semiconductor diode laser and He-Ne laser.
10. Determination of particle size of lycopodium powder using semiconductor laser.
11. Determination of Planck's constant using photoelectric effect.
12. Determination of velocity of ultrasonic waves in the liquid using ultrasonic interferometer.
13. Determination of velocity of ultrasonic waves by acoustic grating.
14. Determination of field along the axis of the coil. (Biot-Sawart Law).
15. Verification Ampère's Circuital Law using a long straight current-carrying conductor and measurement of the magnetic field around it.

L – 45; P – 30 ; TOTAL HOURS – 75**TEXT BOOKS:**

1. Richard Wolfson, "Essential University Physics", Pearson (2011)
2. Dale Ewen, Neill Schurter, P.E. Gundersen, "Applied Physics", Pearson (2005)

6. Markert J.T., Ohanian. H. and Ohanian, M., Physics for Engineers and Scientists, W.W. Norton & Co., 2007.

COURSE OUTCOMES:

- CO1:** grasp the importance of mechanics and the principles of elastic behaviour of materials & apply them to analyze the various substances based on elasticity.
- CO2:** apply the fundamental principles governing the electromagnetic waves and their impact in technology.
- CO3:** comprehend the importance & principles of optics and learn the science of lasers and its applications.
- CO4:** assimilate the ideas of acoustical requirements of buildings, understand principles and generation of ultrasonics and their applications.
- CO5:** get acquainted with the topics concerning principles of quantum mechanics and correlate the relevance in real time application in devices.

SDG 4: Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

Statement:

The modules and topics mentioned in this course are designed to ensure all-inclusive and thorough education with equity to all persons and promote learning opportunities at all times.

GEE 1101	ENGINEERING GRAPHICS	L	T	P	C
SDG: 9		2	0	2	3

COURSE OBJECTIVES:

- COB1:** To develop basic skills in engineering drawing and orthographic projection using BIS standards, covering projections of points, lines, and planes in different quadrants.
- COB2:** To visualize and construct orthographic projections of regular solids.
- COB3:** To impart the ability to generate sectional views and determine the true shape of sections, by enhancing interpretation of internal features.
- COB4:** To introduce isometric projections by creating isometric views of regular solids and frustums using isometric axes and scale.
- COB5:** To familiarize with the basics of Computer-Aided Drafting and Design (CADD), and to draw orthographic projection views of simple machine parts.

MODULE I	INTRODUCTION TO ENGINEERING DRAWING AND ORTHOGRAPHIC PROJECTION OF POINTS, STRAIGHT LINE AND PLANES	L:	T:	P:
		08	0	10

Drawing instruments, dimensioning, BIS conventions, types of lines, simple geometric constructions -Scale - Orthographic projection – first angle, second angle, third angle and fourth angle projections - Orthographic projection of points in all quadrants - Projection of straight lines inclined to both reference planes in first quadrant - Projection of plane lamina inclined to both reference planes in first quadrant.

MODULE II	ORTHOGRAPHIC PROJECTION OF REGULAR SOLIDS	L:	T:	P:
		06	0	06

Orthographic projections of solids in first quadrant: Axis inclined to one reference plane -prism, pyramid, cone, and cylinder only– change of position method.

MODULE III	SECTIONAL VIEWS OF RIGHT REGULAR SOLIDS	L:	T:	P:
		05	0	04

Section of solids: prism, pyramid, cone and cylinder– sectional view – true shape of section- cutting simple position solids – section plane inclined to one reference plane only.

MODULE IV	ISOMETRIC PROJECTIONS	L:	T:	P:
------------------	------------------------------	-----------	-----------	-----------

05 0 04

Principle of isometric projection: isometric scale – isometric axes- isometric projection and view of prism, pyramid, cylinder, cone, frustums and combination of simple solids.

MODULE V OVERVIEW OF COMPUTER GRAPHICS AND CADD L: T: P: 06 0 06

Listing the computer technologies that impact on graphical communication, demonstrating knowledge of the theory of CAD software such as: The menu system, Toolbars (Standard, Object Properties, Draw, Modify and Dimension), drawing area, dialog boxes and windows, shortcut menus, command line, status bar, zoom as used in CAD, select and erase objects. - Sketching orthographic views of simple solids and machine parts as per first angle projection

L – 30; T – 0; P – 30; Total Hours: 60

5. Engineering graphics You tube Lecture videos link: <https://www.youtube.com/user/BSAUNIV/videos>
6. Alternative NPTEL / SWAYAM course: (1.) Prof. Nihar Ranjan Patra of IIT Kanpur on Engineering Graphics and (2.) Prof. Rajaram Lakkaraju of IIT KGP on Engineering Drawing and Computer Graphics

COURSE OUTCOMES: After completion of the course, the students should be able to

- CO1:** Apply BIS standards and conventions to create basic engineering drawings, including projections of points, lines, and planes in various quadrants.
- CO2:** Construct orthographic projections of regular solids with axes inclined to one reference plane using appropriate methods.

- CO3:** Interpret and draw sectional views of solids and determine the true shape of sections for given cutting plane conditions.
- CO4:** Create isometric projections and views of regular solids and frustums using isometric principles and scale.
- CO5:** Use CAD software tools to generate accurate orthographic views of simple machine parts following first-angle projection standards.

Board of Studies (BoS):

25th BoS of Mechanical held on
09.07.2025.

Academic Council:

24th AC held on 26.08.2025

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PSO1	PSO2
CO1	2	1	1						1			1	
CO2	2	1	1						1			1	
CO3	2	1	1						1			1	
CO4	2	1	1						1			1	
CO5	2	1	1		2				1			1	

Note: 1 - Low Correlation 2 - Medium Correlation 3 - High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Understanding various industrial standards for technical drawing and applying orthographic projections to represent simple solids support the development of innovative designs, contributing to sustainable industrialization.

GEE 1102	DESIGN THINKING	L	T	P	C
SDG: 9		3	0	0	3

COURSE OBJECTIVES:

- COB1:** To impart the basics of design thinking and train the students in identifying the opportunity to develop innovative solutions for problem faced by the society
- COB2:** To introduce the tools of empathy and inculcate the problem definition phase of design thinking
- COB3:** To acquaint the idea generation methods used for solving engineering problems
- COB4:** To develop the culture of making prototype from design concepts
- COB5:** To familiarize the role of innovation and patents in engineering

MODULE I	INTRODUCTION TO DESIGN THINKING	L:	T:	P:
		09	0	0

Importance of design in engineering – Evolution of products – Difference between product, process, system and software – Origin and relevance of design thinking – Stages of design thinking - Customer centric design - Development of user persona – Opportunity and problem identification.

MODULE II	PROBLEM DEFINITION	L:	T:	P:
		10	0	0

Empathy: Tools and methods, empathy map, customer journey mapping – Define: Tools used in define phase, 5-WHY method, fish bone diagram, importance of problem framing, Point Of View (POV) statement. Case studies for empathy and problem definition.

MODULE III	IDEATION	L:	T:	P:
		09	0	0

Idea generation: Tools and methods – Bench marking, Brainstorming, idea affinity maps, 6-3-5 method, Mind mapping, SCAMPER, Co-design - Case studies on ideation.

MODULE IV	PROTOTYPING AND TESTING	L:	T:	P:
		09	0	0

Types of prototypes: Prototype fidelity, Evolutionary vs Throwaway prototypes,

Minimum Viable Prototype, Sketch models, Story boards, Digital prototypes, working prototypes, 3D printed prototypes – User testing with prototypes – Test the design feasibility, capability and usability - Value proposition canvas.

MODULE V INNOVATION

L: T: P:

08 0 0

Creativity and innovation – Role of innovation in Engineering – incremental innovation – Break through innovation - scientific approach to driving innovation – Intellectual property rights – Startups - case studies on innovative products and startups.

L – 45; T – 0; P – 0; Total Hours: 45

TEXT BOOKS:

1. Tim Brown, "Change by Design", HarperCollins, 2019.
2. Nigel Cross, "Design Thinking", Berg Publishers, 2011.

5. Eppinger, S. and Ulrich, K., "Product design and development". McGraw-Hill, 7th Edition 2020.

COURSE OUTCOMES: On completion of the course, students should be able to

- COB1:** Explain the basic concepts of design thinking and identify the opportunity for developing innovative solutions for the problem faced by the society
- COB2:** Empathize to collect customer needs and write problem statement based on design thinking principles
- COB3:** Generate innovative ideas for solving engineering problems using the tools and methods of design thinking
- COB4:** Develop and test simple prototypes to verify design viability
- COB5:** Apply innovative approaches to engineering problems and provide design solutions

Board of Studies (BoS):

25th BoS of Mechanical held on
09.07.2025.

Academic Council:

24th AC held on 26.08.2025

CO5			3									3	

Note: 1 - Low Correlation 2 - Medium Correlation 3 - High Correlation

SDG 9: Industry, Innovation & Infrastructure.

The holistic understanding of Engineering design, Design thinking, Prototypes and Creativity and innovation.

Our industries and infrastructure must be upgraded to meet future challenges. In order to achieve this, we must promote innovative, sustainable technologies while also ensuring equal and universal access to information and financial markets.

GEE 1103	DIGITAL MANUFACTURING AND	L	T	P	C
SDG: 8, 9	FABRICATION LABORATORY	0	0	2	1

COURSE OBJECTIVES:

- COB1:** To familiarize with the plumbing and sanitary fixtures in a building.
- COB2:** To understand the materials used in construction, its functions and the structural elements in buildings.
- COB3:** To provide hands-on experience in fundamental manufacturing processes, including various welding techniques and traditional foundry operations, enabling students to understand material joining and shaping.
- COB4:** To introduce modern manufacturing technologies like additive manufacturing (3D printing) fostering diverse fabrication methods.
- COB5:** To provide hands-on experience on basic electrical wiring systems and to ensure safe and effective electrical installations.
- COB6:** To introduce the active and passive electronic components, wire up simple electronic circuits and test them.

LIST OF EXPERIMENTS:**CIVIL ENGINEERING PRACTICE:**

1. Plumbing: Components and tools used in residential plumbing work – Plumbing layout of a typical building – Types of pipes and connection details – plumbing arrangement for washroom and kitchen.
2. Masonry and Concrete: Materials for cement mortar and concrete – Types of wall materials and their arrangement.
3. Steel rebar for construction – Types and properties.
4. Building Frame: Elements of building frame – Typical Load transfer arrangement – Model Making: Foundation, beam and Column.

MECHANICAL ENGINEERING PRACTICE:

1. Introduction to various weld joints. Fabrication of a simple structures using Lap / Fillet Joints using Arc Welding – Gas cutting (Demo)
2. Foundry operations such as sand mold preparation for simple Engineering components.

3. Group exercises in 3D Printers.
4. Joints using Drilling – Study exercise.

ELECTRICAL ENGINEERING PRACTICE:

1. Domestic Wiring
2. Staircase Wiring
3. Measurement of Earth Resistance

ELECTRONICS ENGINEERING PRACTICE:

1. Identifications and symbolic representation of active and passive electronic components
2. Soldering and tracing of electronic circuits and checking its continuity
3. Design and testing of electronic circuits using active and passive electronic components.

L – 0; T – 0; P – 30; Total Hours:30

TEXT BOOKS

1. S.Gowri and T.Jeyapoovan, “Engineering Practices Lab Manual – Civil, Mechanical, Electrical, Electronics included”, Vikas Publishing, 5th Edition, 2019.

1. SubhransuSekhar Dash &K.Vijayakumar, “Electrical Engineering Practice Lab Manual”, Vijay Nicole Imprints Private Ltd., First Edition, 2013.
2. Raghbir Singh Khandpur, “Printed Circuit Boards: Design, Fabrication, and Assembly”, Tata McGraw-Hill Education, 2005.

COURSE OUTCOMES: After completion of the course, students should be able to

- CO1:** To recognize the materials used in construction, its functions, and load transfer arrangement of structural elements in a residential building.
- CO2:** To identify the plumbing and sanitary fixtures, and its arrangement in a residential building.
- CO3:** Identify and differentiate various weld joint types and demonstrate

proficiency in fabricating simple structures using arc welding for lap and fillet joints.

CO4: Demonstrate an understanding of additive manufacturing principles and applications.

CO5: Identify active and passive electronic components and Wire up simple electronic circuits, solder the components and test.

CO6: Apply electrical wiring diagrams to construct domestic and staircase wiring systems

Board of Studies (BoS):

25th BoS of Mechanical held on
09.07.2025.

Academic Council:

24th AC held on 26.08.2025

Note: 1 - Low Correlation 2 - Medium Correlation 3 - High Correlation

SDG 8: Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.

SDG 9: Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Equips individuals with practical skills like welding, basic wiring, and electronic circuit for a stable and sustainable livelihood.

Develops essential infrastructure maintenance skills such as plumbing, and masonry, for resilient and functional buildings and sanitation systems.

GEE 1104	PROGRAMMING FOR PROBLEM SOLVING	L	T	P	C
SDG: 4		2	0	2	3

COURSE OBJECTIVES:

- COB1:** To introduce the basic concepts of computing systems, software, hardware, and programming language evolution.
- COB2:** To equip students with problem-solving skills using algorithms, flowcharts, and design strategies.
- COB3:** To enable students to write structured C programs using variables, operators, control structures, and modular programming with functions.
- COB4:** To gain skills to work with arrays, strings, structures, and unions for solving data manipulation problems.
- COB5:** To provide an understanding of pointers, memory access, file operations, and advanced C programming constructs.

MODULE I	COMPUTATIONAL THINKING AND PROBLEM SOLVING	7
-----------------	---	----------

Fundamental of Computing System-History of computing – Hardware – Software – Languages – Machine - Assembly - High-level - Language Translators – Compiler – Interpreter - Linker - Loader – Program Execution – Design - Flowchart – Algorithm – Design techniques - Divide and conquer- Brute Force – Greedy algorithms - Dynamic Programming.

MODULE II	FUNDAMENTALS OF PROGRAMMING USING C	8
------------------	--	----------

Introduction to C Programming-Structure of C Program- Applications of C language- Data Types - Variables - Constants - Keywords - Operators: Precedence and Associativity – Expressions - Input and Output operations – Decision making – Branching – Looping statements.

MODULE III	ARRAYS AND FUNCTIONS	8
-------------------	-----------------------------	----------

Arrays – One dimensional array - Two and multidimensional array – Strings - String operations – Functions - Category of Functions – Call by value – Call by reference – Recursion - Structures - Unions.

MODULE IV POINTERS AND FILE MANAGEMENT**7**

Pointers - Pointer Arithmetic - Pointers and Arrays - Pointers and Strings - Pointers and Functions - File Handling – File Operations - Command Line Arguments - Preprocessor Directives - Enumerated Data Types and Typedef.

PRACTICALS**15**

1. I/O statements and operators
2. Decision Making statements
3. Looping statements
4. Single and Two dimensional Arrays
5. String Operations
6. Functions: call, return, passing parameters by (value, reference), passing arrays to function
7. Recursion
8. Structures and Unions
9. Pointers
10. File operations in C using standard I/O functions

L – 30; P- 15;Total Hours – 45**TEXT BOOKS:**

2. Ashok. N. kamthane, "Computer Programming", 1st Edition, Pearson Education, ISBN-13: 9788131704486, 2007.

COURSE OUTCOMES: The students who complete this course will be able to

- CO1:** Describe the fundamental components of a computing system, evolution of programming languages, and program execution process..
- CO2:** Develop algorithms and flowcharts using standard problem-solving strategies such as divide and conquer, greedy, brute force, and dynamic programming.
- CO3:** Write programs in C using basic syntax, data types, operators, control structures, and functions including recursion.
- CO4:** Implement arrays, strings, structures, and unions to solve real-world programming problems.
- CO5:** Apply the concepts of pointers, file handling, command-line arguments, and preprocessor directives for efficient C programming.

SDG 4: Quality Education focuses on ensuring inclusive and equitable quality education and promoting lifelong learning opportunities.

Statement: Equipping students with essential programming skills in C programming fosters computational thinking, problem-solving abilities, and software development proficiency that are foundational for lifelong learning and future-ready employment in the digital economy.

B.Tech.	Information Technology	Regulations 2025			
GEE 1105	ENVIRONMENTAL SCIENCES	L	T	P	C
SDG: 3, 6,		2	0	0	0
13, 14, 15					

COURSE OBJECTIVES: To make the student conversant with the

- COB1:** various natural resources, availability, utilisation and its current scenario.
- COB2:** diverse ecosystems and its function, importance of biodiversity, its values, threats and conservation.
- COB3:** types of pollutants and its impacts on the environment and the effects of natural disasters.
- COB4:** impacts of human population, human health, diseases and immunisation for a sustainable lifestyle.

MODULE I Natural Resources

L: 8 T: 0 P: 0

Introduction to Environmental Science - Lithosphere, hydrosphere and atmosphere – Biosphere - Natural Resources: Renewable and non-renewable resources - Natural resources and associated problems: (a) Land resources: soil erosion and desertification (b) Forest resources: deforestation (c) Water resources: conflicts over water, dams: benefits and problems, effects on forest and tribal people, rain water harvesting (d) Mineral resources: environmental effects of extracting and using mineral resources and mining (e) Food resources: changes caused by agriculture and overgrazing, effects of modern agriculture (f) Energy resources: Growing energy needs, renewable and nonrenewable energy sources, use of alternate energy sources.

Case Studies: Case studies in the current scenario in TN/India/across the world

MODULE II Ecosystems and Biodiversity

L: 7 T: 0 P: 0

Ecosystems - Concept of an ecosystem and types: Terrestrial Ecosystems: Forest ecosystem, Grassland ecosystem, Desert ecosystem; Aquatic fresh water ecosystems: Ponds and lakes, rivers and streams; Aquatic salt water ecosystems: oceans and estuaries - Food chains, food webs - Energy flow in the ecosystem - Ecological pyramids - Ecological succession - Biodiversity and its conservation: Types: genetic, species and ecosystem diversity - Values of biodiversity - Invasive, endangered, endemic and extinct species - Hot spots of biodiversity and Red Data

book - Threats to biodiversity - Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity.

Case Studies: Case studies in the current scenario in TN/India/across the world

MODULE III Environmental Pollution and Disaster L: 8 T: 0 P: 0 Management

Carbon foot prints - greenhouse effect, global warming and ozone layer depletion - Sources, cause, effects and control measures of (a) Air pollution (b) Water pollution (c) Soil pollution (d) Marine pollution (e) Noise pollution (f) Nuclear Hazards (g) ill-effects of fireworks and upkeep of clean environment - Types of fire and fire extinguishers - Solid waste Management: types, collection, processing and disposal of urban waste, industrial waste, e-waste and biomedical wastes - Disaster management: flood, drought, cyclone, landslide, avalanche, volcanic eruptions, earthquake and tsunami.

Case Studies: Case studies in the current scenario in TN/India/across the world

MODULE IV Human Population, Health and Social Issues L: 7 T: 0 P: 0

Human Population, Population growth and population explosion - Population pyramid among nations - Human Rights and NHRC - Value Education - Environment and human health: air-borne, water borne, infectious diseases, contagious diseases and immunisation (all types of vaccines), covid-19 and bioweapons - Risks due to chemicals in food and water, endocrine disrupting chemicals, cancer and environment - Sustainable development and SDG - Resettlement and rehabilitation of people - Programme for Family, Women and Child welfare.

Case Studies: Case studies in the current scenario in TN/India/across the world

L – 30; T – 0; P – 0; Total Hours: 30

COURSE OUTCOMES: The student will be able to

- CO1:** analyse the current scenario of various natural resources and their depletion and suggest remedies to curb the exploitation.
- CO2:** identify food chains and web and its function in the environment, assess the impacts on the biodiversity and propose solutions to conserve it.
- CO3:** analyse the types and impacts of pollutants in the environment and propose suitable methods to alleviate the pollutants and the natural disasters.
- CO4:** assess on the impact of human population and the health related issues and immunisation practices and sustainable developments for

a healthy life.

Board of Studies (BoS):

14th BoS of Chemistry held on
17.07.2025

Academic Council:

24th AC held on 26.08.2025

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11
CO1	1		2			3					
CO2	1		2			3					
CO3	1		2			3	1				
CO4	1		2			3	1				

Note: 1 - Low Correlation 2 - Medium Correlation 3 - High Correlation

SDG 3: Good Health and
Well-Being

Ensure healthy lives and promote well-being for all
at all ages

SDG 6: Clean Water and
Sanitation

Ensure availability and sustainable management of
water and sanitation for all

SDG 13: Climate Action

Take urgent action to combat climate change and its
impacts

SDG 14: Life Below Water

Conserve and sustainably use the oceans, seas and
marine resources for sustainable development

SDG 15: Life on Land

Protect, restore and promote sustainable use of
terrestrial ecosystems, sustainably manage forests,
combat desertification, and halt and reverse land
degradation and halt biodiversity loss

Statement:

Natural resources, land and water ecosystems, biodiversity and its degradation,
pollution and its management to have a sustainable environment.

SEMESTER II

MAE 1281	ADVANCED CALCULUS AND COMPLEX	L	T	P	C
SDG: 4	VARIABLES	3	1	0	4

COURSE OBJECTIVES:

COB1: To develop the students in solving problems in double integration.

COB2: To understand the concept of special functions and solving problems in triple integration.

COB3: To acquire the knowledge of vector differentiation and integration.

COB4: To learn the analytic functions and their properties along with conformal mapping.

COB5: To know various methods to solve complex integration.

MODULE I DOUBLE INTEGRATION 9+3

Double integrals – Cartesian and polar coordinates – Change of order of integration – Area as a double integral – Change of variables between cartesian and polar coordinates.

MODULE II TRIPLE INTEGRATION AND SPECIAL FUNCTIONS 9+3

Triple integrals in cartesian coordinates – Cylindrical and spherical polar coordinates – Volume as a triple integral – Beta and Gamma functions – Properties and applications.

MODULE III VECTOR CALCULUS 9+3

Gradient and directional derivative – Divergence and curl – Irrotational and solenoidal vector fields – Line, surface and volume integrals – Green's theorem, Gauss divergence theorem and Stokes theorem (Excluding proofs) – Verification and evaluation of integrals.

MODULE IV ANALYTIC FUNCTION 9+3

Analytic function – Necessary and sufficient condition (excluding proof) – Cauchy Riemann equations in polar coordinates – Properties of analytic function – Determination of analytic function – Conformal mapping ($w = z+a$, az and $1/z$) – Bilinear transformation.

MODULE V COMPLEX INTEGRATION 9+3

Statement and application of Cauchy's integral theorem – Cauchy's integral formula – Taylor's series and Laurent's series expansion – Singularities, classification and residues – Cauchy's residue theorem – Contour integration – Unit circle and semi circular contours (excluding poles on the real axis).

SDG 4 – Quality Education: Ensure inclusive and equitable quality education and promote lifelong opportunities for all.

Learning various mathematical tools will lead to knowledge of applications in engineering problems.

CHE1181	CHEMISTRY FOR ENGINEERING	L	T	P	C
SDG: 6, 9	APPLICATIONS	3	0	2	4

COURSE OBJECTIVES: To make the students conversant with

- COB1:** the basic water quality parameters and the current scenario in terms of TDS, TSS, DO, hardness, alkalinity and their treatment.
- COB2:** Preparation, properties and applications of various polymers and composites
- COB3:** Types of corrosion, corrosion rate and control methods
- COB4:** Metals, nonmetals, alloys and their property and applications
- COB5:** Different types of sensors, working principle and applications.

MODULE I	WATER TECHNOLOGY	L:	T:	P:
		9	0	0

Sources of water - Types of impurities in water: Physical, chemical and biological impurities - Specifications of water for domestic use (recommended by BIS and WHO) - Water Quality Parameters: Physical Characteristics - Colour, Turbidity (Turbidimetry and nephelometry), Taste and Odour (dissolved gases), Total Dissolved Solids (TDS), Total Suspended Solids (TSS) and Chemical Characteristics: Hardness - types and estimation (EDTA method), boiler problems, Acidity and Alkalinity (types) and pH correction, DO, BOD, COD - Water softening: Internal Conditioning (Carbonate, Phosphate, Calgon and colloidal conditioning) and External Conditioning (Ion-exchange process) - Desalination: Reverse Osmosis - Purification using nano and biomaterials - Domestic water treatment (Physical Processes: Screening, Aeration, Coagulation, Sedimentation, Filtration, Disinfection (UV treatment, bleaching powder and breakpoint chlorination)) - Heavy metals in water: Arsenic, Lead, Fluoride, Mercury in water, effects and removal.

MODULE II	POLYMERS	FOR	ENGINEERING	L:	T:	P:
	APPLICATIONS			9	0	0

Classification based on source, structure and intermolecular forces (elastomers, fibers, resins, plastics (thermoplastics and thermosetting plastics)) - Society of the Plastics Industry (SPI) Codes - Glass Transition Temperature and its significance - Preparation, properties and applications of: Commodity Polymers: Polyethylene (LDPE,

HDPE), PVC and PMMA - Engineering Polymers: polycarbonate, Teflon, bakelite, ABS Co-polymer (Terpolymer) - Conducting polymers (Polyaniline) – Light emitting polymers (Polypyrrole (PPy)) - Biopolymers (PLA) - Dielectric polymers (Polyimide) - Foams (polyurethane) - Polymer blends and alloys (Definition and example) - Compounding and moulding techniques: Types (Injection Moulding and blow Moulding) - Polymers in sensors, self-cleaning and healing polymers (windows).

MODULE III CORROSION AND ITS PREVENTION

L: T: P:
9 0 0

Types of corrosion - dry and wet corrosion - Electrochemical corrosion: galvanic corrosion, differential aeration corrosion and types - Rate of corrosion (weight loss method) - Factors affecting corrosion and determination - Prevention of corrosion: choice of materials and design - Corrosion inhibitors - anodic, cathodic, vapour phase and nano inhibitors - Sacrificial anodic protection and Impressed Current Cathodic Protection - Electroplating and electroless plating of PCB.

MODULE IV METALS, ALLOYS, METAL OXIDES AND COMPOSITES

L: T: P:
9 0 0

Metals: copper, iron, aluminium - electrical conductivity and thermal conductivity, electrical wiring, components - phase changing materials heat sink - Alloys: steel (carbon alloy), brass and bronze (copper alloys), titanium alloys, solder (Pb and Sn) and lead-free solder - strength, hardness, and corrosion resistance - Metal oxides and mixed metal oxides: semiconductor, hardness and strength, catalysts, ceramics, clay based insulating materials - Composites: metal matrix composites, metal ceramics composites, metal fiber composites - strength and weight reduction, Fibre reinforced plastics (FRP).

MODULE V SENSORS

L: T: P:
9 0 0

Sensors: Introduction and types - Principle, working and applications of Electrochemical sensors: MEMS and NEMS – Biosensors: construction, working and classification, Advantages - Biochips and genomics - Touch sensor (oximeter and glucometer) - Toxic gas sensor (H₂S and CO (septic tank)) - Smoke sensor - humidity sensor - temperature sensor - alcohol sensor (breathalyser).

PRACTICALS

1. Estimation of hardness in water sample.
2. Estimation of the alkalinity of water sample.
3. Estimation of dissolved oxygen in water sample.
4. Removal of hardness from the water sample by carbonate and phosphate conditioning.
5. Determination of total suspended solids by evaporation method
6. Preparation of polymers - polylactic acid, epoxy resin, PMMA
7. Moulding - Demo
8. Corrosion (acid, base and salt) and control (anodic and cathodic inhibitors)
9. Rate of corrosion (weight loss method)
10. Electroplating of copper on iron nail and determination of plating rate
11. Estimation of metals in alloys (precipitation method)
12. Synthesis of mixed metal oxides/ceramics/FRP
13. Glucose detection and alcohol sensing

L - 45; T - 0; P - 30; Total Hours: 75

9. Brian R. Eggins, Chemical Sensors and Biosensors, John Wiley & Sons, Ltd., 2002.

COURSE OUTCOMES: The students will be able to

- CO1:** Determine hardness, alkalinity, dissolved oxygen, TSS associated with any water and suggest the treatment processes as per water quality.
- CO2:** Choose the polymers based on properties and application and the method of preparation.
- CO3:** Identify the type of corrosion and suggest the methods to control it.
- CO4:** Choose the materials from metals, meta oxides, alloys and composites based on their property and application.
- CO5:** categorize the sensors based on its applications to real time situation.

SDG 6: Clean Water and Sanitation

Ensure availability and sustainable management of water and sanitation for all

SDG 9: Industry, Innovation & Infrastructure

Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation

Statement:

Water quality parameters and its treatment methods ensures the availability of clean drinking water, Polymeric and composite materials, metals and alloys as well as sensor systems for sustainable design and industrialization

GEE 1106	BASIC ELECTRICAL AND ELECTRONICS	L	T	P	C
SDG: 7	ENGINEERING	3	0	0	3

COURSE OBJECTIVES:

- COB1:** To introduce the fundamentals of DC circuits, including laws, components, and basic analysis techniques.
- COB2:** To provide an understanding of fundamental concepts on single phase and three phase AC circuits.
- COB3:** To impart knowledge about the construction, operation, and applications of various electrical machines.
- COB4:** To familiarize students with diode, its characteristics, and applications.
- COB5:** To familiarize students power devices their characteristics, and applications.

MODULE I DC CIRCUITS L: 9

Voltage, Current, Power, Energy –Ohm’s Law-Kirchhoff’s Laws – Series and parallel circuits - Voltage Division and Current Division Rule - Source transformation - Mesh analysis & Nodal analysis – simple problems.

MODULE II AC CIRCUITS L: 9

Sinusoidal voltage – RMS, average, peak value, peak factor and form factor – single phase RL, RC and RLC circuits – Phasor representation – Power and power factor – Resonance in RLC circuits-Q factor-Simple problems – 3 phase balanced circuits– star and delta connections.

MODULE III ELECTRICAL MACHINES L: 9

Construction, principle of operation, Basic Equations and applications - D.C. Generators, D.C. Motors, Single Phase Transformer, three phase induction motors, BLDC motor.

MODULE IV DIODES AND THEIR APPLICATIONS L: 9

PN Junction diodes – Construction, VI Characteristics - Rectifiers: Half wave, Full wave - clippers, clampers - Zener Diode as Voltage regulator- Load and line

regulation- Diode protection circuits- Light Emitting Diode

MODULE V BIPOLAR JUNCTION TRANSISTORS AND POWER DEVICES L: 9

BJT - Common Emitter, Common Base and Common Collector configurations- Construction, VI Characteristics, BJT as switch and amplifier- Signal and Power devices - SCR, Triac - Construction, VI Characteristics- Charging circuit, UPS, SMPS, Fan Regulator.

L – 45; T – 0; P – 0; Total Hours: 45

4. R. L. Boylestad and L. Nashelsky, *Electronic Devices and Circuit Theory*, 11th edition, Boston, MA, USA: Pearson, 2015.

COURSE OUTCOMES: The students will be able to:

- CO1:** solve basic DC electrical circuits using fundamental laws.
- CO2:** compute the electrical parameters in single-phase and three-phase AC circuits.
- CO3:** compare the operating principles and performance characteristics of Electrical machines.

- CO4:** analyse the configuration and operation of LT switchgear components and earthing systems.
- CO5:** interpret device characteristics and its basic applications.

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO 10	PO11	PSO1	PSO2

CO4	3	3	2	2	2							2	2
CO5	3	2	4	2	4							2	2

Note: 1 - Low Correlation 2 - Medium Correlation 3 - High Correlation

SDG 7 – Affordable and Clean Energy

Statement:

The course introduces DC and AC circuit analysis, electrical machines which are essential in renewable energy systems, power distribution, and sustainable industrial automation. It includes semiconductor devices and digital electronics, which are critical in energy-efficient electronic systems and smart grid technologies. It also Promotes awareness of energy consumption, power factor, and efficiency, aligning with the goal of clean energy usage.

instruction sequencing - Microinstruction formats and execution - Pipelined control design and hazard handling.

MODULE V Memory and I/O Organization

L: 9 Hrs

Memory hierarchy: Cache, virtual memory - Storage types: RAM, ROM, associative memory - I/O interfacing, buses, DMA and interrupt handling - Memory-Level Parallelism (MLP) - Prefetching and optimization techniques

Total Theory Hrs: L:45

LAB EXPERIMENTS

1. **Verification of Logic Gates:** Verify the truth tables of basic gates (AND, OR, NOT, NAND, NOR, XOR, XNOR)
2. **Boolean Expression Simplification using Karnaugh Map** - Minimize Boolean expressions and implement them using basic gates.
3. **Design and Implementation of Combinational Circuits- Half Adder, Full Adder, Binary to gray code converter, Priority Encoder.**
4. **Design and Implementation of Flip-Flops - SR, JK, D, T**
5. **Design of Ring counter, 4-bit Binary counter**
6. **ALU Simulation** – Design a basic ALU supporting arithmetic and logic operations
7. **RTL Simulation** – Model simple register transfers and ALU control
8. **Instruction Execution Simulation** – Fetch–Decode–Execute cycle visualization
9. **Control Unit Modeling** – Microprogrammed control simulation
10. **Memory and I/O Interfacing** – Simulate basic memory access and interrupt-driven I/O

Total Practical Hrs: 30

L – 45; P – 30; Total Hours:75

TEXT BOOKS:

1. Carl Hamacher, Zvonko G. Vranesic, Safwat G. Zaky, NaraigManjikian, *“Computer Organization and Embedded Systems”, 6th Edition, McGraw-Hill Education, 2012*

2. John Hennessy & David Patterson, "*Computer Architecture: A Quantitative Approach*", 6th Edition, Morgan Kaufmann, 2019.
3. M. Morris Mano, "*Computer System Architecture*", 3rd Edition, Pearson, 1992

COURSE OUTCOMES:

On completion of the course, students will be able to:

- CO1** Represent data using number systems and implement logic functions using Boolean algebra and gates.
- CO2** Design and analyze combinational and sequential circuits.
- CO3** Describe computer organization components and explain the instruction cycle and micro-operations.
- CO4** Elaborate basic control units using hardwired and microprogrammed techniques and explain the operation of pipelined processors.
- CO5** Describe the organization of memory and I/O systems, including cache, virtual memory, and advanced memory-level parallelism and prefetching strategies.

Board of Studies (BoS):

Note: 1 - Low Correlation 2 - Medium Correlation 3 - High Correlation

SDG 4: Quality Education

Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all.

Statement:

This course contributes to **SDG 4** by providing foundational knowledge in computer systems and architecture, empowering students with critical digital competencies required for careers in engineering, research, and innovation. It promotes **technical literacy**, **problem-solving skills**, and prepares learners to engage in **lifelong learning** in a rapidly evolving digital world.

ITE 1202	PROGRAMMING IN PYTHON	L	T	P	C
SDG: 9		3	0	0	3

COURSE OBJECTIVES:

Students will:

- COB1:** Understand the basic syntax and structure of Python programs.
- COB2:** Apply control structures, loops, and functions to solve real-world problems.
- COB3:** Manipulate data using Python collections such as strings, lists, tuples and sets.
- COB4:** Understand dictionaries and set operations.
- COB5:** Perform file handling and carry out basic data analysis using Python libraries.

MODULE I PYTHON BASICS AND CORE SYNTAX L: 8

Statements – Input/Output – Variables and types – Text and numbers – Arithmetic Expressions – Error Handling and comments – Python shell and Data types – Objects – Formatted Strings – List – Tuple

MODULE II CONTROL STRUCTURES AND FUNCTIONS L: 8

Decisions - Boolean logic and operations – Loops - Loop structures – Break/continue/else with loops – Functions - writing and calling functions – Parameters – return values – scope

MODULE III WORKING WITH DATA COLLECTIONS L: 9

Modules and packages – StringOperations and Slicing – List and list comprehensions – Tuple – tuple packing and unpacking – Sets – Unordered collection of unique elements

MODULE IV DICTIONARY AND SET OPERATIONS L: 10

Dictionary and iteration – Conditions and Looping in dictionaries – Set operations - Recursion – math recursion – recursion with strings and list – Inheritance and method overriding

MODULE V FILE HANDLING AND EXCEPTION HANDLING**L: 10**

Libraries - External packages – File handling (Text / CSV) – Exception handling – Introduction to NumPy and Pandas - Exploratory Data Analysis – Basic Data Visualization – Case study on data analysis using python

L – 45; Total Hours:45**TEXTBOOKS:**

5. Udayan Das, Aubrey Lawson, Chris Mayfield, Narges Norouzi, "Introduction to Python Programming", OpenStax, Rice University, 2024.
6. Eric Matthes, "Python crash Course, A Hands-on project-based Introduction to Programming", 3rd edition, No starch press, 2023.

3. John Zelle, "Python Programming: An Introduction to Computer Science", 4th Edition, 2021.

COURSE OUTCOMES:

On completion of the course, students will be able to:

- CO1:** Understand and apply basic Python constructs including variables, input/output, expressions, and error handling.
- CO2:** Implement decision-making and iteration constructs and modularize code using functions with proper scope and parameters.
- CO3:** Utilize strings, lists, tuples and sets efficiently and apply built-in modules to perform common tasks.
- CO4:** Design and build programs using dictionaries, and set operation logic to problems.
- CO5:** Read/write data using files and apply libraries like NumPy and Pandas for data manipulation and visualization.

SDG 9: Foster innovation and build foundational programming skills essential for digital infrastructure and technological advancement.

Statement:

Encourages innovation through technology development since python is widely used in AI, IoT, web applications, and scientific computing—key enablers of innovation.

ITE 1203	PROGRAMMING IN PYTHON	L	T	P	C
SDG: 9	LABORATORY	0	0	2	1

COURSE OBJECTIVES:

Students will:

- COB1:** Understand the basic syntax, semantics, and structure of Python programming.
- COB2:** Apply control structures, functions, and data types to solve computational problems, and develop programs using arrays, strings, lists, tuples, dictionaries, sets and built-in functions for real-world scenarios.
- COB3:** Implement intermediate-level programming constructs such as recursion, file handling, and exception management.
- COB4:** Design and test Python programs that use modular programming approaches.
- COB5:** Work with libraries, matrices, and structured data, and develop simple applications or mini projects.

PRACTICALS:

List of Experiments:

Fundamentals

1. Basic Syntax and I/O
 - Input / Output, Arithmetic operations, Type conversion
2. Control Flow and Loops
 - Conditional statements (if, else, elif), Looping (for, while), Leap year, prime check, odd/even, etc
3. Functions and Recursion
 - Defining and calling functions, Factorial using recursion, Fibonacci sequence using recursion
4. Strings and String Operations
 - String slicing and manipulation, removing characters and checking binary strings, sorting words and removing punctuation
5. Lists and Tuples
 - List operations: append, remove and slicing, cloning lists, Finding max, min, even/odd elements

Intermediate Programs

6. Dictionaries and set usage
 - Dictionary merging and transformation, Sorting dictionaries, Set operations for filtering and comparison

7. Mathematical and Number Theory Programs

- Armstrong numbers, Disarium, Harshad, Happy numbers, Sum of series (natural, cube)

8. Array and Matrix Manipulations

- Sum/product of array elements, Largest/smallest in array, Array rotation and split

9. Matrix Operations

- Addition, multiplication, Transpose

10. Conversions and Calculations

- Decimal to binary/octal/hex, BMI calculator, Simple calculator program

Advanced Applications**11. Using Built-in Libraries**

- Calendar module, Random number generation, Math module: natural log, power, sqrt

12. File Handling

- Reading and writing text files, File append, read line by line, Word/character frequency count

13. Exception Handling

- Try-except blocks, Handling file and input errors, Custom exceptions (intro)

14. Mini Project / Capstone

- Calculator with GUI (Tkinter), Student gradebook manager, Library management (basic features)

P –30; Total Hours:30**TEXTBOOKS:**

1. Udayan Das, Aubrey Lawson, Chris Mayfield, Narges Norouzi, "Introduction to Python Programming", OpenStax, Rice University, 2024.
2. Naomi Ceder, "The Quick Python Book", 4th Edition, Manning Publications, 2025.
3. Zed A. Shaw, "Learn Python the Hard Way", 5th edition, LearnCode.academy, 2023-2024.

REFERENCES:

1. Allen B. Downey, "Think Python: How to Think Like a Computer Scientist, 2nd Edition (Updated Release)", Green Tea Press / O'Reilly, 2021.
2. John Zelle, "Python Programming: An Introduction to Computer Science", 4th edition, Franklin, Beedle and Associates, 2021

COURSE OUTCOMES:

On completion of the course, students will be able to:

- CO1:** Write, test, and debug basic Python programs involving arithmetic and control flow.
- CO2:** Apply functions, recursion, and data structures (lists, strings, tuples) effectively, and demonstrate use of built-in libraries and file operations in practical scenarios.
- CO3:** Implement and evaluate programs using object-oriented concepts.
- CO4:** Solve problems using algorithmic approaches (sorting, searching, number theory).
- CO5:** Create simple Python applications or mini-projects with user-defined logic.

Board of Studies (BoS):

20thBoS of IT held on 12.06.2025

Academic Council:

24th AC held on 26.08.2025

GEE 1205**UNIVERSAL HUMAN VALUES**

L	T	P	C
2	0	0	2

SDG: 4, 8, 10, 16 and 17**COURSE OBJECTIVES:**

The objectives of the course are to

- COB1:** To enable students to grasp the fundamental concepts and significance of value education, fostering positive behavioral changes that enhance their personal growth and professional conduct.
- COB2:** To examine core human values, the relationship between the self and the body, and how these values can guide ethical behavior in both personal and professional contexts.
- COB3:** To promote understanding of the principles of harmony within oneself, relationships, families, and society, and how these contribute to a sustainable and balanced life.
- COB4:** To provide knowledge and insights into the ethical responsibilities of engineers, the significance of engineering ethics, and the importance of leadership and ethical decision-making in the field.

MODULE I INTRODUCTION TO VALUE EDUCATION**L: 8**

Value Education - Concept, Importance and Need - components of Value Education, Human Rights and Value Education - Self-exploration as the Process for Value Education - Continuous Happiness and Prosperity - The Basic Human Aspirations, Method to Fulfil the Basic Human Aspirations - Strategies for Transition towards Value - based Life and Profession

MODULE II HARMONY IN THE HUMAN BEING**L: 7**

Meaning and Relevance of Harmony in Human Beings - Core Human Values - Application of Universal Human Values - Understanding The Human Being as Co-Existence of Self ('I') And Body - The Needs of Body vs. Self - Fulfilling the Needs of the Self and Body - Understanding the Relationship between Body and Self - the Activities of the Self and the Body - The Mind as a Key Factor in Fostering Harmony in Human Beings - The Influence of Scriptures on the Formation of Human Values.

MODULE III HARMONY IN THE FAMILY, SOCIETY AND NATURE L: 7

Components of Harmony in the Human Beings – Harmony in The Family: Understanding Values in Human Relationships - Vision for The Universal Human Order – Harmony in Nature: The Four Orders in Nature - Understanding Harmony in The Society.

MODULE IV THE BASICS FOR ETHICAL CONDUCT OF ENGINEERS L: 8

Why Engineers Should Learn About Ethics - Significance of Engineering Ethics - Senses of Engineering Ethics - Engineering Code of Ethics - Commitment: The Foundation of Professional Success in Engineering - Leadership in Engineering and Industry - The Ethical Implications of Technology.

L – 30; Total Hours: 30

SDG 4: Quality Education focuses on value education, which is essential for promoting inclusive and equitable quality education. It emphasizes the development of critical thinking, ethical conduct, and personal growth, all of which are key components of quality education.

SDG 8: Decent Work and Economic Growth highlights the ethical implications of technology that is essential for fostering responsible and ethical behavior in future engineers, and which contributes to decent work and economic growth.

SDG 10: Reduced Inequalities aligns with efforts to reduce inequalities by encouraging ethical behavior, respect for others, and harmonious relationships, which are essential in building inclusive societies.

SDG 16: Peace, Justice, and Strong Institutions promotes peaceful and inclusive societies, access to justice for all, and accountable, effective institutions. It aligns deeply with the principles of value education by emphasizing harmony, ethical conduct, human rights, and social justice.

SDG 17: Partnerships for the Goals integrating ethics into professional education, especially for engineers, students are encouraged to contribute positively to collaborative global efforts in solving complex challenges.

The course syllabus aligns with **SDGs 4, 8, 10, 16 and 17** by focusing on value education, ethics, human rights, harmony, and responsible engineering practices. It contributes to peaceful, just, and inclusive societies through self-awareness, interpersonal harmony, and responsible citizenship aligned with universal human values. These themes are essential for promoting sustainable development, equality, and ethical conduct, which are core elements of the SDGs.
