Object Automation System Solutions Pvt Ltd – Chennai – 600088

Industrial Visit to Object Automation System Solutions, Chennai

On April 07, 2026, an industrial visit was conducted to Object Automation System Solutions, Chennai. The visit commenced at approximately 9:30 a.m. A group of 70 students of II Year BCA (Artificial Intelligence), accompanied by faculty members Dr.G.Gomathi,Dr.A.K.Ashfauk Ahamed,Dr.E.Manogar, Dr.S.Jeevitha, Dr.KMN.Syed Ali Fathima arrived at the organization around 10:30 a.m.

The purpose of the visit was to provide students with an in-depth understanding of emerging technologies such as Artificial Intelligence, Quantum Computing, Cybersecurity, and advanced computing systems. During the visit, the company representatives delivered an informative session outlining the organization's vision, technological innovations, and its role in developing intelligent systems for real-world applications.

Object Automation System Solutions is a technology-driven organization focusing on advanced domains such as Generative AI, Chip Design, High Performance Computing (HPC), and Cybersecurity. The company also collaborates with academic institutions to provide training programs, workshops, and research-oriented projects.

Objectives

- To provide students with practical exposure to advanced computing technologies and industry practices.
- To understand the applications of AI, Quantum Computing and Cybersecurity in real-world scenarios.
- To enhance students' technical knowledge in data science and hardware-based systems.
- To create awareness about career opportunities in emerging technological domains.

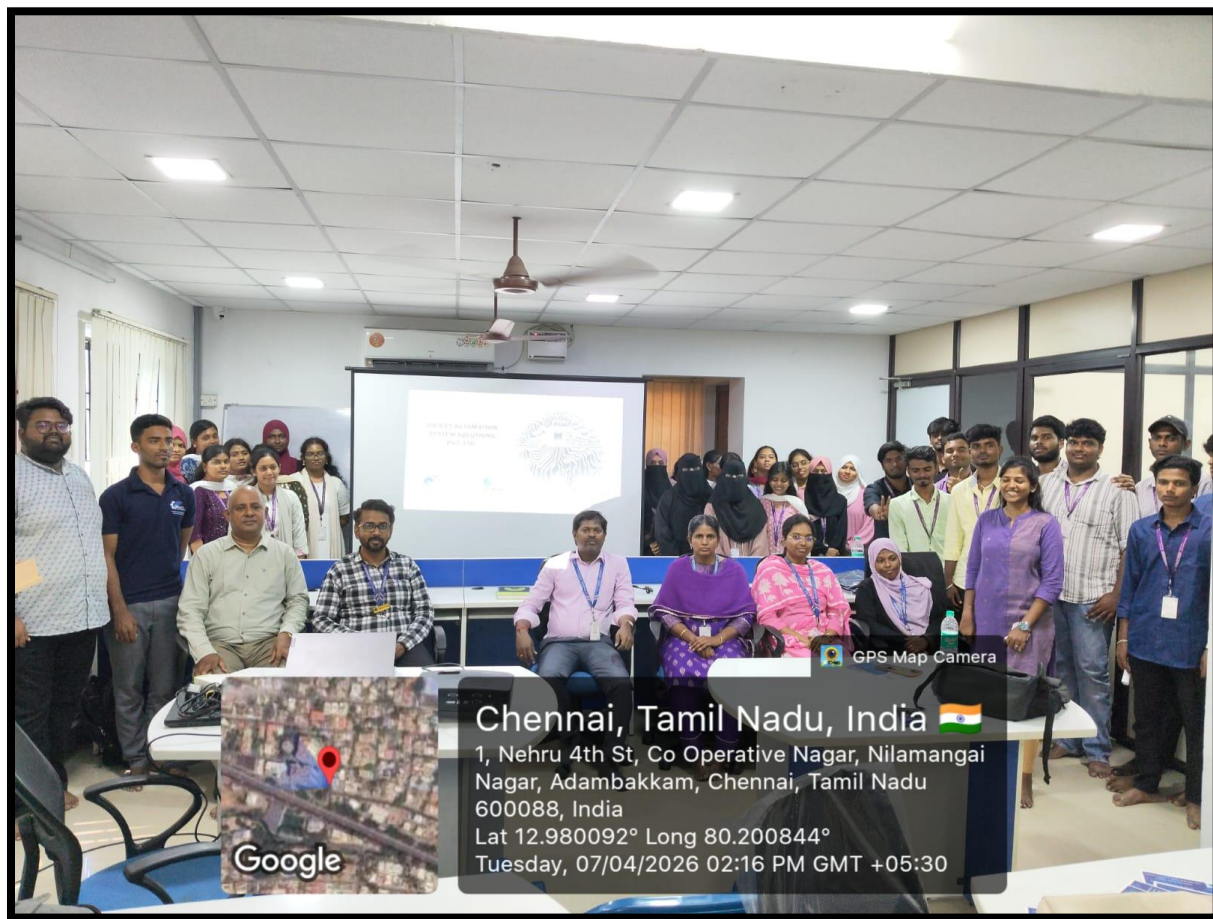

Outcomes of the Visit

- Students gained knowledge of Generative AI and Large Language Models.
- They understood the fundamentals of Quantum Computing.
- They gained insights into FPGA-based computing and chip design.
- The visit enhanced understanding of Python and Data Science workflows.
- Students developed awareness about innovation, teamwork, and continuous learning.

Conclusion

The industrial visit provided valuable exposure to current industry trends and technological advancements. The visit concluded at around 1:30 p.m., after which the students and faculty returned to college by 3:00 p.m.
